

A sophisticated scheduling tool. Type in an outline of your project, select an activity bar type and create a customized chart. Or simply type in dates and durations to generate bars. FastTrack Schedule will help you visualize your projects, activities and events in a smart timeline format, which can be enhanced for presentations. A background database will track start/finish times and dates, duration, percentage complete, and scheduled vs. actual activities. Features include page previews, wallchart options, floating graphics and text blocks and multiple column types. Import or Export to and from MacProject, Microsoft Project, spreadsheets, databases and many other programs, for fully integrated scheduling.
