

The easiest way to brainstorm, diagram and write. A fast outlining tool: jot down ideas, create ideas maps, flow charts, visuals, outlines, reports and stories. Helps you to visualize and free associate ideas. 'Brainstorm' captures and sets out your ideas within expandable symbols, which you can rearrange and link across pages. 'Diagram' uses standard symbols as well as your own graphics; link 'families' of outlines together, with full colour support. 'Write' turns your brainstorming session into an organized outline, which you can add to and rearrange, developing your ideas into finished concepts, plans, reports or stories. Outlines can be imported/ exported to and from popular word processors. System 7 savvy.
