

For management of people, rooms, equipment, services, time and activities. Every manager wants to allocate available resources instantly and efficiently: FastTrack Resource enables you to identify your most effective resource management strategy. You can navigate through a range of options, as FastTrack Resource allows you to experiment, showing you how one allocation solution might affect another. Gantt charts show activities graphically, against a basic timeline; histograms show the allocation of resources, while combination charts show resources and activities. Plan your activities to meet your deadlines by maximising your resources.
