DomainSearcher --- Your Domain Name Research Assistant!

DomainSearcher makes it easy for you to search for domain names from Internic---the domain registration company! It's the easiest way to search for and investigate possible domain names before registering your own domain name.

Easy to use interface removes all Internet complexities. Never heard of "whois?"---Don't worry about it! Parses and presents server response in an easy to read format. View found domain name information or even open up found domains' web sites from the program (using your default browser) Save or print found domain list and information. Link to Internic's home page for domain registration.
