

EUDORA LIGHT FREeware (POSTCARDWARE!!)

EudoraLIGHT is a fantastic E-mail client, versions available for Windows 3.1, Windows 95, and Mac. Without a doubt the best e-mail client in the world. This is the freeware version of Eudora for Windows. There is also a commercial version of Eudora called Eudora Pro (Version 2.0 and above). If you would like information about the commercial version, a brief description is provided in the Help menu of this freeware. Select About Eudora Pro to display this dialog. You can also subscribe to the QUALCOMM Enterprise Software Technologies (QUEST) mailing list by selecting QUEST News from the Help menu. This list will provide subscribers with occasional information about Eudora, Eudora Pro, and other QUEST products.

The Windows freeware user manual can be found at
<<ftp://ftp.qualcomm.com/quest/windows/eudora/documentation/>>

Eudora Light is postcardware!

If you try out Eudora, and decide that you'd like to use it on a regular basis, then just send a postcard to the following address:

Jeff Beckley
QUEST
QUALCOMM Incorporated
6455 Lusk Blvd.
San Diego, CA 92121-2779
USA

Postcards that have something to do with where you live are an especially good choice, as I like to see all the interesting places that Eudora is being used. Humorous or unusual postcards are a favorite of mine, and you never know when I may decide that someone's postcard was interesting enough to make them a tester for the commercial version of Eudora.
