

Letter Sounds A to Z

An easy way to learn basic letter sounds, this interactive audio program features clear enunciation of the sounds of the letters. Click on a button and hear the correct pronunciation!

To Run the Program:

Simply double-click on the file "LetterSoundsAZ.exe" (Win) or LetterSoundsAZ.app (Mac) to start. The launcher will automatically detect your screen size and launch the appropriate large or small program.

Features:

- Contains all 26 letters.
- The pronunciations are crystal clear.
- The letter buttons have "roll-over" color highlighting and wide "hit-zones" for younger users.

Uses of this program:

You, as the teacher, can learn the pronunciations quickly and accurately before teaching your student. You won't have to wonder if you are pronouncing them correctly; now you will know for sure!

Your student can learn directly from the program. Give him several letters to learn at a time. After he has clicked on each letter several times, he will have a good idea of the sounds. Then he can test himself. He can hover the mouse over the letters, say the sound(s) aloud, and click to hear the audio. He will have instant feedback, and instant feedback means faster learning.
