Pro CD Internet Directory v1.0
Release Notes

Thank you for purchasing Pro CD Internet Directory! Pro CD Internet Directory is an easy-to-use CD-ROM reference tool that gives you instant access to 200,000 registered Internet domain names, IP addresses, World Wide Web and FTP sites, along with company name, address, city, state/province, ZIP/post code, country, telephone number, SIC code, and registration date.

Reminder: Please register so we can keep you informed on future product developments and provide you with free technical support and software updates.

Features:

- Online Help: You'll find detailed information on all the features and functions of the Pro CD Internet Directory in our Online Help. Choose *Getting Started* from the *Help* menu for complete information on how to put Pro CD Internet Directory to work for you.

- Search by SIC code or business heading: Use Pro CD Internet Directory's SIC code searching feature to find specific business types that interest you.

- Search off-line to save time and money: Online searches for the sites that interest you can be time consuming and expensive. Pro CD Internet Directory can find the information you want while you're off-line, saving connect charges.

- Export or Print an unlimited number of listings: Export or print as much of the database as you want. Export your listings to a variety of file formats for import into your contact manager, spreadsheet, or database. Print your listings in Galley or Label formats.

- Quickly connect to a selected listing: Automatically dial a listing's voice phone, or connect to it's World Wide Web site, or FTP server. Use your Hayes-compatible modem, internet connection, or web browser to connect to the listings you find in Pro CD Internet Directory. You can also connect directly to our Web site for product information and technical support. Pro CD Internet Directory is compatible with the following web browsers:
   Netscape Navigator, Spyglass Mosaic, Chameleon WebSurfer, Microsoft Internet Explorer

- Floating Toolbar: Move the toolbar to suite your work habits. Anchor it to the top, bottom, or sides of the screen, or leave it floating in the middle.

- Bonus Software: Pro CD Internet Directory includes the SiriusNet Internet Access Kit, featuring the Netscape navigator Web Browser. For questions or help with SiriusNet, please contact: Netlink Ltd.   800-745-2747

New from Pro CD:

ZIPFix: ZIPFix is a complete address standardization program that can be used to enhance any DBF formatted database containing address information.   ZIPFix is specifically designed to standardize and add ZIP + 4 to addresses to insure that the address lines conform to the United States Postal Service recommendations . The Find ZIP Code feature, gives the user the ability to search for, and find any ZIP code in the United States.

Select Street Atlas: The only street atlas that includes nearly one million essential businesses and places built right into the map. Select Street Atlas includes over 150,000 cities, towns, and points of interest. Starting with Second Edition 1996 Pro CD directories, we have offered an export option that lets you export your listings to view them at the street level with Pro CD's Select Street Atlas.

Canada Business Phone: This latest Canadian database provides over 2 million business listings from phone directories across Canada on one disc. Listings may be searched by name or telephone number, then limited by other fields.

List Match: Use List Match with Select Phone or Canada Phone to match, append, and enhance your house lists. List Match lets you update records saved in Access 1.0/2.0, dBASE III/IV, Excel 3.0/4.0/5.0, FoxPro, and Paradox 3.x/4.x database formats.
