```

Shuffle everything

1.2 Note and Disclaimer

The modules on this disk have been sorted and selected without any attempt to create a complete or perfect module collection. Only my own subjective taste of what sounds good and what does not decided. If hope you find some nice tunes, anyway :-)

ONE MORE NOTE:

Many VERY GOOD modules had to be deleted from my personal module collection, before I put it on this CD. This is mainly because of one reason: Although there is no certain way of being able to tell if a module created of samples

ripped from various commercial songs is violating the copyright (because many modern pop songs do this too and noone really cares) the Meeting Pearls Team is afraid of certain people, who could try to denounce us for copyright violations.

This apprehension grew mainly out of the most superfluous thing that ever engaged amiga peoples mind: The f***ing amiga CD discussion. If you ever thought mankind could turn their minds for the better, this dispute of some dull, concrete-brained individuals would have told you better.

It is a real pity, how such things can ruin fun and joy, and I can only hope that some day thoughts like these will be gone again. Especially the small group of amigoids could die real soon from such examples of narrow mindness.
