Chapter 1

schmidt-e

1.1 Angela Schmidt

```
Name:      Angela Schmidt
E-Mail:    Angela.Schmidt@stud.uni-karlsruhe.de

Technical data:

Born:      on Easter sunday 1970, at around 4 p.m. in Hilden,
           Germany
Height:    170 cm
Weight:    52 - 54 kg - depending on quantity of stomache filling
Shoe size: 41

Curriculum vitae:

1970: Birth in Hilden
1971: First sister enters this world
1974: Moved to Wiblingen, southern Germany
1974: Kindergarten
1976: Moved to Burlafingen, Bavaria - finally a "home of my own"
1980: Began education at college
1982: The nestling is born
1984: First contact with computers in the school: Siemens PC 16-10
1986: Purchased the first computer: an Amiga 1000 - a decision I never
      regretted
1989: Won two "golden disks" at one blow
1989: Passed graduation, afterwards driver's license
1989: Matriculation for computer science in Karlsruhe
1990: Gained access to the Internet
1992: Passed first level of diploma ("Vordiplom" in Germany)
1992: First Amiga meeting I organized myself, in Illertissen
1993: First attempts with a (unicycle?)
1994: Second Amiga meeting I organized myself in Neu-Ulm
1995: Second Meeting Pearls CD-ROM
1995: Third Amiga meeting I organized, in Neu-Ulm
1995: Third Meeting Pearls CD-ROM
1996: Fourth Amiga meeting I organized, in Neu-Ulm
```

```
Projects:

RDB-Salv        - Salvage of corrupt RigidDiskBlocks
MakeCD          - creates CD-ROM images and writes CDs
                  Thousand thanks to Patrick Ohly, who wrote this program
                  together with me.
DisKey          - a disk editor
pattern.library - pattern matching under 1.2 and up. Contains
                  fewer bugs than the corresponding AmigaDOS routines
Kiskometer      - shows all SetFunction() calls
Law texts       - as AmigaGuide and WWW pages (on Meeting Pearls III)

Food:

  Preferred meals (some of these are impossible to translate [the editor])

   - Apfelstrudel, Knödel, China meals, Leek souffle, Spaghetti,
     Reiwadatschi, Grießbrei, Salad dishes, Brätknödel soup, Kässpätzle
     and a lot of others, but no tomatoes and no cucumber

  Cakes:
   - Arabian honey cake, Förster cake, Schwarzwälder cherry tart,
     Nut cake, Kipferln, Mohn cake, Aprikosen-Quark-Streusel cake,
     cheese cake, fruit cake and many others, but no banana.

  Sweets:
   - Lindt Fioretto Zabaione, mild chocolate - but without marzipan,
     butter truffle, "Gummibärchen" (gum bears?) without artifical
     colors and many more.

  Drinks:
   - almost any kind of mineral water, but not that diet stuff. Orange
     juice, multi-vitamin juice, pine-apple juice and many more. Alcohol
     only in small amounts.

  Active non-smoker:
   - hasn't had a single breath from a cigarette or alike in her whole
     life. Sometimes however she cannot avoid being an actively suffering
     passive smoker which causes dangerous sounds from her stomache
     especially during long bus or car drives.

Hobbys:

What she likes to do:
 - programming
 - talking to interesting people on the phone (record: almost 6 hours for a
   single call)
 - Internet: IRC, News, Mail, ...
 - discussing interesting topics
 - dreaming with open eyes
 - skiing
 - reading
 - driving unicycle (even on inner city footways)
 - teasing and tickling nice people
```

  - "torturing" little sisters
  - seeing good movies
  - climbing cherry, plum and apple trees (and tuckin' in a good deal)
  - playing thinking or skillfull games

What she unfortunately hardly finds time for:
 - baby sitting / playing with young children
 - riding (despite of three involuntary visits to the ground)
 - playing with Chicco, our cat
 - cooking and baking cakes (quantity record: spaghetti for about 70 people)
 - biking (distance record: Ulm -> Karlsruhe on a single day: 210 km)
 - just relaxing

Hardware:

Currently two computers, A1000 and A3000. Furthermore an unused Acer 915
with 512 KB RAM and intel 80286.

A1000: 68030 at 40 MHz w/ MMU, 68882 at 40 MHz
       8 MB Fast-RAM, 2 MB Chip-RAM
       flicker fixer and 17" monitor
       SCSI with internal 2 GB harddisk, external devices are
       changing often
       ZyXEL EG plus
       2 external disk drives

A3000: 68030 at 25 MHz, 68882
       8 MB Fast-RAM, 2 MB Chip-RAM
       14" monitor
       internal 1 GB harddisk, external devices are changing
       often
       second internal disk drive

external SCSI devices:
       A3070 (QIC-Streamer by Commodore)
       Toshiba 4101 (CD-ROM drive)
       Quantum PD425S (harddisk, about 400 MB)
       Q52S (harddisk, about 50 MB)
       Q1080S (loan of the "Schatztruhe" for creation of Meeting Pearls)
       HP 8 GB Streamer (loan of the "Schatztruhe" for creation of
                          Meeting Pearls)

Pictures:

Picture 1: Although just one year old, she already protects her face with
       her hands as soon as she perceives a camera - however, she's
       not yet very experienced..

Picture 2: If there's no cat near here, there's always the little sister
       for cuddling.

Picture 3: Just aged 4, she is already very concentrated while doing the
       spoon&egg run. Ok, she was not the fastest, but her egg stayed
       on the spoon all the time.

Picture 4: The first photo taken by a photographer: 5 years old, in the

kindergarten.

Picture 5: At the age of 14 she has to fight with her little sister who
          – being as fresh as she is – tries to steal her nose. Compared
          with that the other sister is definitely easier to handle...

Picture 6: At the photographer with both sisters: Summer 1989, after having
          passed the college graduation.

Picture 7: Finally, a new family member: Chicco

Picture 8: Another visit at the photographer for my parents' silver wedding
          in 1994.

Picture 9: In September 1995 in University of Karlsruhe. I also use this
          unicycle to ride through Karlsruhe.
