

NOTE REGARDING THE MUSIC:

In the "Michelangelo" disk you have the option of listening to a musical soundtrack in the MIDI format which will play in the background when activated. This soundtrack may be turned off or on at any time from the control panel, accessed by clicking on the Options icon with the question mark.

If you have any difficulty playing the MIDI audio:

- Confirm that you have MIDI drivers installed on your computer by checking the Windows Configuration in the Program Manager.
- Consult the manufacturer's documentation supplied with your computer and/or sound card.

In the case that you are unable to play MIDI format audio, this will in no way affect the normal function of the product's narration and film audio.
