

Play Back Buttons on E-Mail Projects Not Responding

The information in this article applies to:

- Microsoft Graphics Studio Home Publishing 99

SYMPTOMS

=====

When you view an e-mail greeting in Netscape Navigator and click the Replay, Pause, Back, Forward, or About buttons, the buttons may not always respond.

RESOLUTION

=====

The Replay, Pause, Back, Forward, or About buttons are fully functional. However, you may have to position your pointer completely over the buttons in order to make them respond to your click.

MORE INFORMATION

=====

The page indicator button next to the About button changes based on the length of the greeting and does not respond when you click it.
