

"Microsoft Home Publishing setup cannot continue..." Error

The information in this article applies to:

- Microsoft Graphics Studio Home Publishing 99

SYMPTOMS

=====

When you run the Setup program for Home Publishing, you may receive the following error message:

Microsoft Home Publishing setup cannot continue because you do not have administrator privileges on this computer.

CAUSE

=====

To run Home Publishing on Windows NT, Setup copies some files to your System folder and makes entries into your registry. In order for Setup to do this, you must be a member of the Administrator group when you log on.

NOTE: You can check your user status with the User Manager.

RESOLUTION

=====

Before you begin the installation process, log on as administrator

MORE INFORMATION

=====

Home Publishing runs on Windows NT, version 4.0, SP3 or later.
