Cannot Set Reminder for Current or Next Day

The information in this article applies to:

 - Microsoft Graphics Studio Home Publishing 99

SYMPTOMS
==========

If you try to set a reminder for the current day (today) or next day
(tomorrow), you may receive the following message:

    Notice...
    Your date was added, but the day is not far enough in
    the future to set a reminder.

CAUSE
======

By design, the earliest date for which you can set a reminder is 24 hours
from the next 8:00 AM.

RESOLUTION
============

Set reminders for at least two days in advance.

MORE INFORMATION
==================

Reminders are scheduled to go off when the computer is started after 8:00
AM on the day for which the reminder is set. In order to correctly set the
reminder, you must set it more than 24 hours before 8:00 AM on the day you
want to be reminded.
