ABOUT THE EDITION

The **WinOnLine™ Review™ Shareware Edition** is published weekly except for the last week of the month by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Week after week** we bring you the *newest shareware, freeware* programs and *features*, such as:

Windows Shareware Briefs - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

New Files - Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

Feature Reviews - Hear about hands-on experiences with the inner workings of the some of the **newest shareware**, with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

The WinOnLine™ Review™ Shareware Edition

is published courtesy of the

Windows OnLine™

We hope you find this weekly publication of great value and interest and become a regular reader. We'd appreciate your comments and suggestions. Leave a comment (C) on **Windows OnLine™ (BBS)** at **1-510-736-8343** or write to,

Windows OnLine
Box 1614

(Voice 510-736-4376)

Enjoy!

Wally

EXCLUSIVE WOLLY INTERVIEW

Wolly has done writeups on **over 225 shareware and freeware programs** in the first twenty issues of the WinOnLine Review™ Shareware Edition, so we thought it would be a good time to get to know him a little better. Editor Bob Gollihur conducted the first-ever interview with Wolly:

Wolly, you come off pretty strong some weeks with your opinions about shareware programs.

I really care about the shareware concept, and it really bugs me sometimes. Sure, there are no real rules, but when somebody puts out barely-functional shareware for \$35.00 or a newbie posts a totally useless beta disaster with an enthusiastic but fictional descriptor, it hurts the legitimate authors' credibility.

Are you a Windows expert, or a programmer? What do you think makes you qualified to say what you do?

Wolly does not claim to be a Windows guru. Wolly is a Windows *user*, with lots of real-world experience. Wolly prefers to *use* Windows, not analyze it.

What do you use as guidelines when you do a review?

What Wolly does is not really a review. It's more like advice from a friend. Consider Wolly as your computer buddy whose opinion you generally trust, who spends time combing Windows OnLine for "neat stuff". Once a week he gives you the straight poop on a bunch of programs and lets you know what the new True Type fonts look like. He saves you the trouble of downloading and wading through useless programs and points out the programs which might interest you. Gee, this Wolly is a nice guy. <g>

You don't "rate" programs with stars or anything like that. Why not?

Because it's presumptuous of me to believe that I know your exact needs. I could give an Address Database program two stars because it doesn't have a dialer, but what if you don't need a dialer? It could be a five star program to you.

Then how do we know whether you recommend it or not?

I think it's pretty clear what Wolly thinks of a program by the tone of the piece. I invented and have used the term "moronware" more than once, and have cheered other programs' features and

functions. My purpose is to give you *impressions* of a particular program and thoughts about its use, maybe a pretty picture.

Shouldn't you tell us more facts and details?

It would be different if the Shareware Briefs were *commercial* briefs. Then you need more specifics and opinions before you make an investment. With shareware, if the program sounds like it might be what you're looking for, you can audition it for free, and toss it aside if it's not quite on target. Wolly just gives his impressions based on his experiences and tries to zero in on what's important to know. The rest is up to you.

Thanks for talking with us, Wolly!

Sure. Now get out of my face and let me get back to this week's column. What'll you see this stupid signmaking program I ran across --- definitely moronware! Ahh, but look at this new audio editing program. THIS is what makes it all worthwhile!

In spite of his attitude, Wolly has a good heart and is glad to entertain questions from readers. Leave him a message on Windows OnLine. If you are a new caller, you can leave a (C)omment to the Sysop; you will be given a menu so you can direct your message directly to Wolly.

Bob Gollihur, Editor

TWO EDDIE GOODIES!

Author Ed Hoffman has blessed us with reviews of two utilities that definitely deserve a spot in your **Swiss Army Knife Sub-Directory**. Check them both out to see what Wolly means. The time to d/l these invaluable tools is today!

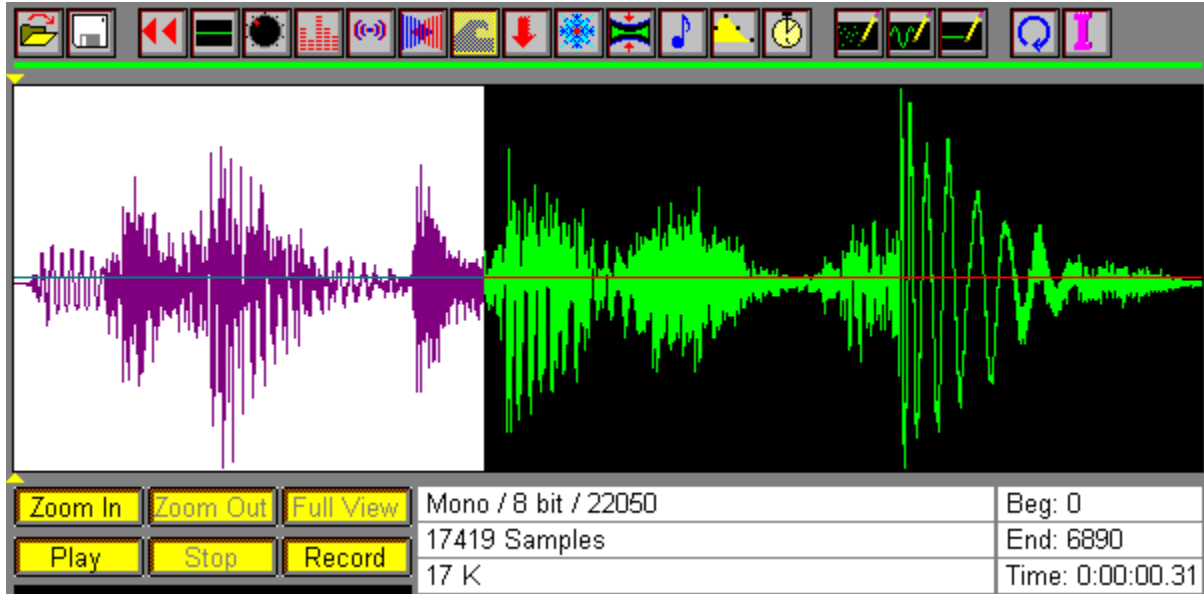

Enjoy the issue !

COOL WAVEFORM EDITOR

BEYOND Cool!

THIS is incredible. If you have anything to do with WAVs or editing music files or MIDI, etc., audition this program. Check out the fade-ins and outs . . . volume and pans . . . eight band **graphic equalizer** per channel . . . **echo, also adjustable in eight frequency bands** with delay in ms and with **adjustable falloff ratios** . . . **flanging and phasing**, also adjustable. How about **stretching or slowing the WAV, preserving the pitch and tempo** or not? Or get original and drag and drop quarter notes or hemidemisemiquavers* to a staff to **create your own composition**. Yikes!!! You can also **generate tones or noise**, or . . . the sounds of silence. Play your CD collection through it, too! **COOLED.ZIP** (175K) goes beyond cool and is registered for the incredible sum of **\$10.00** that brings a disk in return with more capabilities. Certain parts of this distributed version are freeware; consult the docs.

*the first reader who knows this term *without* looking it up in their thick Webster book (Bob knew, but then he has a sordid past) and leaves Wolly a message on Windows OnLine receives absolutely no prize except recognition that they are a master or trivia or a former music major with a memory for useless effluvia.

PRAIRIE DOG HUNT

Let's go kill some dawgs!

This little game is at the least, **amusing**, with all its **sound effects and splashes of blood** as you kill the little critters popping up in the plains. Don't get upset, they're not cute, but just a pair of eyes (*Now, wait a minute!!*) that taunt you with their calls. Choose from **three weapons of destruction**, a few other options, and aim and shoot. Careful, five bites from rabid prairie dogs will do you in! **WINDOG10.ZIP** is from Diversions Software, it was, and **it made me smile**. Registration is **\$15.00**.

NUTRI-DIET

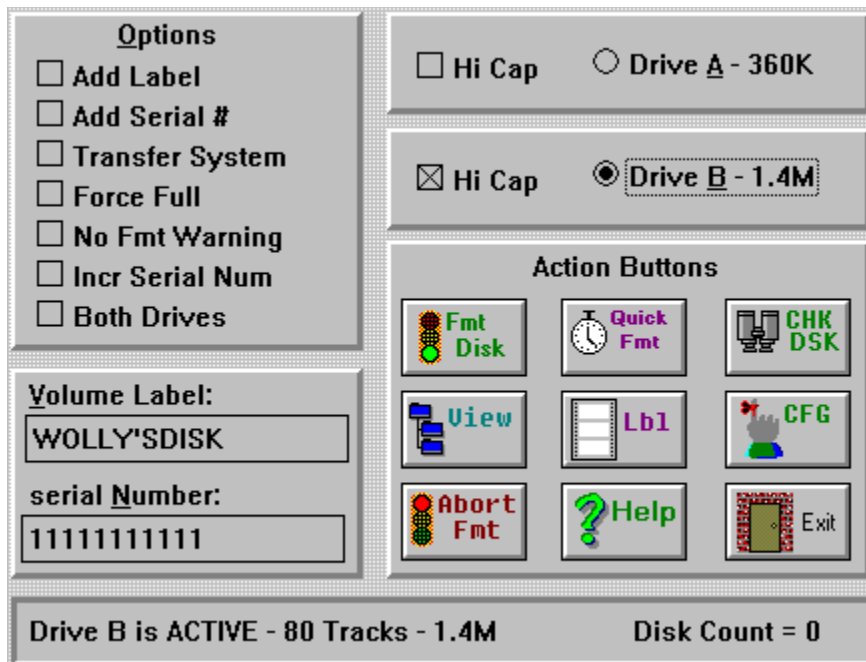

Is pepperoni pizza one of the four food groups?

MEAL COMPOSITION FILE		
FOOD DESCRIPTION	OZ	CAL
RICE, BROWN, LONG, COOKED	3.0	95
SHRIMP, BOILED/STEAMED	3.0	85
BROCCOLI, RAW	2.0	16

NIACIN	4.5 mg	22.6
CALCIUM	92 mg	9.2
IRON	5.0 mg	27.7
PHOSPHORUS	260 mg	26.0

No. This is **not another meal planner**. Nutri-Diet helps you to **balance your meals** by knowing the nutrients, fat and calories contained in your food. An extensive database of a wide variety of types of food is available, from which you **specify the ingredients of the dish you intend to prepare**, and that data comes from USDA information that **can be updated or expanded by the user**. Many measures of quantity are available so you can obtain precise results. Each ingredient you add can display its contribution, positive or negative, to the final result. Nutri-Diet is a good "give and take" exercise to **see where you can cut fat or calories or add essential nutrients** to make the most of your meals. Or perhaps not. **NDWIN.ZIP** (154K) can be registered for **\$10.00**.

FORMAT MASTER

Master of Magnetic Media

Clean and simple, with all the options you need at your mouse's beck and click. Run `chkdsk`, or do a quick format, view the contents currently on the disk before formatting, change or add serial numbers and labels. This very understandable and usable utility is available from Windows OnLine at [FMW11.ZIP](#) (78K) and can be registered for **\$25.00**.

TRUE TYPE FONTS

Fontaholics beware:

רקיִדש רקיִדש **TASHER.ZIP** (42K)
 (includes normal, thin, hollow and bold)

GADZOOX **GADZOOX.ZIP** (11K)

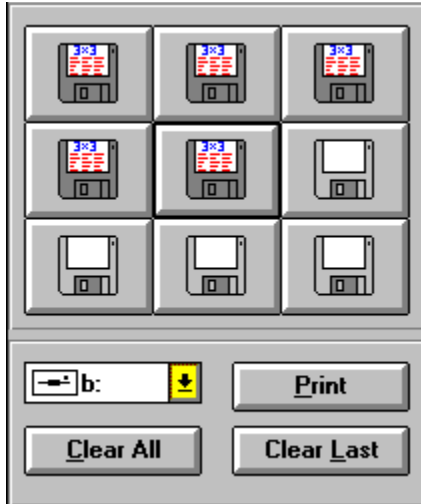

☞☞☞☞☞☞ **HERATT.ZIP** (23K)
 (In days of old when knights were bold, and . . .)

Oregon Dry Plain **OREDRI.ZIP** (14K)

Theodoric **THEOTT.ZIP** (22K)

3x3 LABELER

Almost Ready

This is an **intelligently designed disk labeler** for Windows. Though **not quite mature, it shows promise**. 3x3 Labeler uses the Avery #5196 full sheet labels (or equivalent) and allows you to print individual or groups of labels on the sheet so you are not committed to always printing nine labels at a shot. Choose your own recurring or one time **Edge Text (7 point) and Banner Text (16 point)** to print over the disk contents. Faults? Yes. This is an early version and the author provides a list of enhancements he plans. You have no choice of fonts or sizes of any of the components and options to show directory names and contents are not shown. **3X3_10.ZIP** (53K) shows a lot of potential and Wolly will **look forward to future enhanced releases**. Registration is **\$20.00**, perhaps ambitious given its current form.

CD MASTER

Not exactly

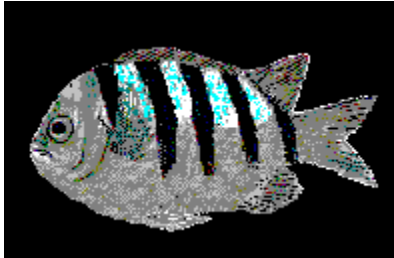

CD Master	Title	Tracks	End
EXTREME - III Sides to Every Story			
5:18	Warheads		↑
6:01	Rest in Peace		
5:04	Politicalamity		
5:00	Color Me Blind		
5:56	Peacemaker Die		↓

CD ROM drives are not only good for data, but great for music if you've got a nice receiver and pair of speakers hooked up like Wolly. He boogies right through his reviews, and CD Master helped him this week. **Not only a player, it is a catalog database program**. Sensing the unique ID on each CD inserted, it will **display the title and selections on the CD** and play a predetermined program if you've programmed it with this information previously. The **track update process is tedious**; each has to be processed individually in order to be saved. Curiously, somewhat obtuse Category, Tempo and Classification selections are available to define each selection, but they do not seem to be used for anything, such as in a search situation. The CD player portion also only allows playing a selection from the beginning, so **searching for a spot within a song is not possible**. Registration options for **CDMST12.ZIP** (140K) range

from **\$11.00 up** depending upon your pleasure.

SEASCAPE

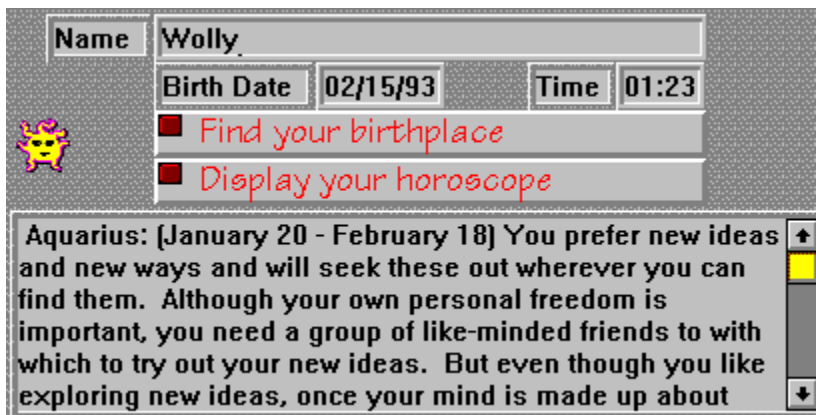

Screen borer

It's called SeaScape, but all I found was the same species (so identical as to be *very* close relatives) swimming to the right or left in a very black sea with no vegetation or any interesting background, occasionally gobbling a white dot. Screen saver fans seem to go for those with great **action, variety and/or color, and this has d) none of the above.** **SEASCA13.ZIP** (174K) can be registered for **\$10-12**, and uses Window's built-in mechanism to run.

ASTRO LITE

Only half the fat! <g>

The stars tell us the way, or so it is said. Astro-Lite purports to **provide your birth horoscope** (Wolly's is shown in the graphic) as well as your daily outlook. It is recommended that you place it in your startup group to see what the day will bring. You are given a menu choice to receive a **serious or silly prediction**. Wolly's prediction for August 6th was *This transit is great for harmonious relationships, so you should go join a choir. Be sure to belt those tunes right out. Wait--did we say HARMONIOUS? We meant HORMONEous. Your hormones are having a field day in your body and they are telling your brain all kinds of wacko stuff. For instance, even your co-workers are starting to look good. Even the ones that clean their ears with pencil erasers! Your best bet is to get real drunk, then if you do anything stupid, you have something to blame it on.* Yes. That was the silly one. A map of the U.S. allows residents to **specify their**

place of birth for a more accurate (??) reading. Cute, **ASTLIT.ZIP** (140K) is "\$20 bux" from Flat Broke Software.

Wolly's Bottom o' the Heap:

SIGNMAKER

Crippled and Contemptible

This **demo program** is intended to make small signs up to 8.5 x 14 inches. It is **unremarkable** and much like a mini-mini-word processor, allowing choices of font, size and justification. You can also choose only from a few specific size signs, though you can't change your mind afterwards. What is remarkable is that the author wants **\$50.00** for registration for **SIGNMKV1.ZIP** (92K) and he *won't* take personal checks. **Windows Write can do everything and more than this turkey will do.** Author Michael Dunn of Port St. Lucie, Florida --- *are you for real?* Wolly is sending this guy a poison pen postcard.

by

as told to Bob Gollihur

Changelt 1.2

Anyone who has ever moved Windows from one hard drive to another quickly finds one of Microsoft's more frustrating and time consuming oversights. There is no simple way to redefine the file locations within Windows. *No big deal, you say? Just change a couple of entries and you're back in business.* Well, Binkey, you'd better sit down for this one. Not only do you need to change the Program Manager entries (*.GRP files), but then you've got the *.PIF files, and the *.INI files too. And don't forget the PATH statement in your AUTOEXEC.BAT file. This could become a bit more involved than the simple changes you initially thought you needed to make. In fact this operation might just cause a mental hernia.

So what, you say smugly, I don't plan on ever moving my Windows directory. Well, Binky, you may not have any control over this situation. Say, for example, you have a single hard drive with two partitions, C: and D: and your Windows programs are on D:\WINDOWS. You come into some money and decide to add that new hard drive you've been drooling over for the past year. Well, you install it and all of a sudden your D:\WINDOWS is now E:\WINDOWS. Another example of this inadvertent relocation is with Doublespace, Stacker, or other disk compression utilities that fiddled with your drive letters, leaving your Windows files stranded on a drive different from where they were initially installed. Finally, if you plan on installing a network on your system you can almost be assured that your drive letters will get screwed up.

Rather than kicking the cat and screaming at the kids, you can simply use **Changelt** to help resolve the problem. To quote Thom Foulks, the author of **Changelt**:

Changelt WON'T do everything for you; there are simply too many possibilities.

Changelt WILL look at any .GRP, .INI, or .PIF file and change all references to a given drive letter to a different drive letter. For .GRP files, it will re-calculate the file's internal checksum so that the new .GRP file will be acceptable to Program Manager. And, it preserves the original file with a .CHG file extension, in case your file-moving hits problems.

Changelt will NOT accept wildcards, and will operate on only one file at a time each change should be tested, prior to making another one.

ChangeIt does NOT move files, or copy them again, there are too many possibilities of how you want your Windows system arranged.

ChangeIt will NOT search your drive for files; it must be used from within the directory where the target file resides. (Ever see a system with 3 count 'em MAIN.GRPs? I have. No, I don't know how it got that way.)

ChangeIt will NOT deal with file references maintained separately by various Windows software packages (as example, Word for Windows .DOT files); again, there are too many possibilities.

Even though *ChangeIt* works on Windows files, the program itself is a DOS program and works from the DOS prompt. The proper syntax for the program can be found by simply typing the program name, *ChangeIt*, at the DOS prompt. An best of all, ChangeIt is freeware. So you don't need to register it with anyone. Whether you plan to move your Windows directory or not, ChangeIt is a utility that is certainly a worthwhile addition to your system. Members of Windows OnLine can find *ChangeIt* as CHANGEIT.ZIP in Directory #150 - (Windows- New Uploads).

ChangeIt 1.2 (Freeware)

THE LATEST WINDOWS FILES

The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.

WINDOWS - NEW UPLOADS from August 1, 1993 through August 7, 1993

(older files omitted)

(File Name - Byte Size - BBS Date - File Description) (Comments in **RED**)

- !WDK413A.ZIP 191809 08-02-93 WinDisKlone v4.13 for Windows 3.x **Single pass diskette copier** with cooperative multitasking for true background operation. That is, you can do other things while copying diskettes. Automatic "upsizing" too! Puts PM's diskcopy & format to shame. Compressed file images, compare, clean, fastformat, etc. Single, multi, and network versions available. Notice:

Windows OnLine (BBS) makes every effort to identify and to post only shareware, freeware, demos, working models and drivers (software files and programs) for it's membership which are intended for free public distribution. Due to the lack of documentation and other descriptive files contained within certain archives, it can be quite difficult to identify and remove improper and otherwise copyrighted files and programs from our file listings.

It is the policy of Windows OnLine (BBS) not to allow such improper and illegal files and programs on the BBS, at any time. Our Readers and Members are asked to cooperate with us in our efforts to identify such improper files and to assist WOL in its efforts to remove ANY inadvertent inappropriate file postings.

Thank You.

OS/2 THE LATEST OS/2 FILES

The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.

The following directory contains all new DOS files to WOL

148.	DOS	- NEW UPLOADS	534	75,602,101
-------------	------------	----------------------	------------	-------------------

Totals For All DOS Files	18,995
2,135,274,842	

Grand Totals	29,786
3,402,129,410	

This listing is as of June 1993 and is presented as an example of the tremendous number of WOL directories and files available to members. Remember, these are clean file listings, purged of useless duplicates or obsolete files. Windows OnLine™ works hard to gather the best and latest for its members!

Windows OnLine™ brings
THE BEST AND LATEST FILES

NO JUNK - we obtain the files ourselves, screen them thoroughly and edit their descriptions

THE LATEST FILES and MORE FILES - we get them EVERY DAY!

MINIMAL DUPES - we clear off the old when we bring on the new

EVIDENCE: Scan the **NEW FILES LISTINGS** in this issue. This is just our Windows and OS/2 files. Twice as many DOS files come in each week in addition to the quality and quantity you see here.

NOW, LOOK AT THE SIZE AND NUMBERS OF FILES in our listings:

This index is published as a service to help you locate previous Reviews and Briefs on programs and topics in which you are interested. Two listings are shown, one by program name followed by a second organized by program topic.

***** WinOnLine Review Shareware Edition INDEX *****
 Issues 1 through 18

-----by Program Name-----

Program Name	Topic	Issue
Accent	Keyboard redefinition	6
Account Manager	Time Clock	7
ADial	Dialer	9
Aerobic Calc	Calorie Expenditure	17
Alfred	Popup Menu	11
Aliens	Screen Saver	1
Aliens	Video Game	13
All Ini	INI File Maintenance	16
Arc Dib	Graphics Cataloger/Compressor	15
Area Code	Area Code Database	7
Atlantic City Blackjack	Game, Blackjack	18
Atoms	Game	2
Auto Key	File Autosaver (Feature)	2
BlinC	Contact Relationship Manager	7
Block Breaker	Video Game	11
BMP Browse	Graphics Viewer	15
Bog	Word Game	2
Brain Jam	Solitaire Variation	15
Bulletin Maker	Church Bulletins	1
Business Calculator	Financial/Retail Calculator	10
Casino Blackjack	Card Game	9
Cassette Case Liner	Cassette J-Card Designer	15
CD Audio	CD Player	17
Chalkboard Math	Arithmetic Drilling	9
Chart Tamer	Presentation Charts	12
Chemical	Molecular Modeling	10
Cleanup	File Duplicate Utility (feature)	17
Cleanup	File Duplication Search/Del	12
Computer Vendor/Products DB	Software Database	14
Confound	Game of Strategy	8
Control Panel Applets	Control Panel Access	16
Convert	Unit Conversion	9
Convert It!	Unit Conversion (Feature)	14
Converter	Unit Conversion Utility	1
Credit Report Repair Kit	Credit Report Advice/Ad	15
Crete Calc	Concrete Requirement Calc.	2
Cyberspace Crossword Puzzle	Game	14
D'Menu	Mouse Right Button Utility	1
Dancing Bear	Screen Saver using Windows	3
Date Line	Clock/Resource Bar	1
Date Nag	Reminder/Work Logger	6
Dialog	Dialer/Phonebook/Logger	6
Diary	Diary program	18

Discard	Game, Solitaire Variant	6
Disk Copy	Disk Utility (Feature)	12
Disk Factory	Disk Background Utility	3
Disk Factory	Disk Utility (Feature)	12
Disk Information Program	Disk Tracking Utility	17
Disk Line	Disk Resource Monitor	12
Disk Space	Disk Resource Monitor	13
Disk Trak	Disk Contents Database	18
DocuPower	WinWord Add-in (Feature)	1
Dots	Game	12
Double Match	Games, Concentration	16
Drag and View	Text/Graphic Viewer	2
Dragger	Mouse Utility for Disabled	11
Dragon Creator	Dragon Criteria Creator (text)	10
DT Search	Search Utility	11
Elvis n Space	Game, Adventure	9
Emoticon	Smiley ;-) Utility	18
Eric's Amazing DFall/Win	Disk Space/Machine Utility	14
Event! PC	PIM, Major Event	12
Fast Mouse	Game, Shooting	15
Fileware	WinWord Add-in (Feature)	1
Fire Exit	Exit Utility	13
Font Line	Text Rotation/Spacing Tool	3
Font Me!	Font Management	1
Font Me!	Font Utility (Feature)	7
Font Monster	Font Viewer/Grouper	3
Font Name	Font Data Viewer	2
Font Namer	Font Utility (Feature)	7
Font Printer	Font Utility	11
Font Spec	Font Management	14
Fonter 6.0	Font Utility (Feature)	7
Free Disk Space	Disk Space	16
From Scratch	Recipe Database	17
FTaskman	Task Manager Replacement	8
GL Video	Video Library Database	7
Graphical Space Viewer	Directory Space Viewer	5
Gravity Desk	File Mgmt & 40 Char. Descr.	2
Gray Tree Frog Address List	Address/Dial Utility	18
Hi-Lo	Game of Cards	4
Higher Achievement	PIM/Additional Features	15
Home Accountant	Bookkeeping	10
Ico Show	Icon Manager	7
Icon Bar	Launch Bar, 4 Applic.	12
Icon Library Builder	Icon Editor/Cataloger	13
Icon Manager	Icon Edit/Cataloging Utility	12
Icon Master	Icon Manager (feature)	15
Icon Move	Icon Viewer/FileMover	5
INI Navigator	INI Management	14
Invoice-It	Invoice Production	2

**Wolly uses the following system
to evaluate programs auditioned
for the Shareware Briefs:**

Siemens UM 486-33DX
16 megs RAM, 256K cache
14" .28 SVGA Monitor
Diamond Stealth 24, (S3, 1 meg)
2 IDE Drives 245, 210 megs
Colorado 250 meg Tape Backup
Soundblaster 16
Panasonic CD ROM 150kb, 390ms

**A second system is also used on
occasion to confirm results:**

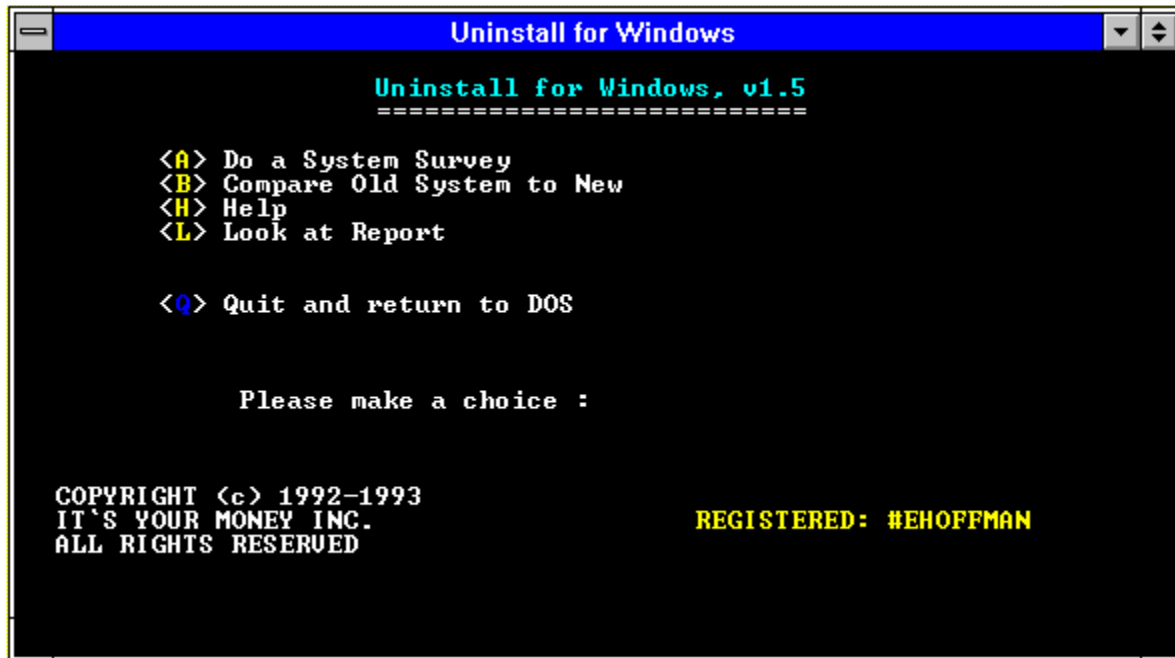

386-25DX
4 megs RAM
14" .31 VGA
Generic 256K VGA
1 ESDI Drive using Stacker

Windows, for all its positive aspects, does have one annoying habit – hiding files all over your system. No matter what type of program you load into Windows, if you want to remove it, you're never quite sure you've got it all. It's a lot like getting rid of cock roaches. Just when you think their gone, one will pop up in the least expected area. Those familiar with DOS know that aside from the occasional addition to the AUTOEXEC.BAT or CONFIG.SYS, most DOS programs pretty well stay where they are put. Not so with Windows. As one who works with a large number of programs, both commercial and shareware, I've found the size of my system grows and grows for no apparent reason. While I knew this was happening, there seemed to be precious little I could do to stop this spread of files.

Sure, you could go into your Windows directory and System directory and ferret out the files you know don't belong there. But you must be careful, removing the wrong file can cause your complete system to go on an unexpected sabbatical. So, I've taken the cowards way out, if I have ANY doubt about a file, I leave it alone. While not the best approach to the problem, it was the safest method. But, now I have another alternative to help keep my hard drive reasonably free of unwanted files. This alternative is *Uninstall for Windows*, a unique and well written file utility that has made life much easier.

Uninstall for Windows is written as a DOS application, rather than a Windows program. There are two major reasons for this: first, since the information that *Uninstall for Windows* deals with originates at DOS level, it is better to treat it at the DOS level. Second, making *Uninstall for Windows* a DOS program, relieves the inherent Windows overhead, and makes the program much smaller. In addition, *Uninstall for Windows* is so easy to use, there isn't even an issue over the interface – there's just one menu with five choices – does anyone REALLY need 3-D buttons for that? For those more comfortable in Windows however, an icon and PIF are included to let you set up *Uninstall for Windows* to run directly from Windows at the click of a mouse.

The program is very simple and straight forward to use. To run the *Uninstall for Windows* program simply comply with the following five-step sequence:

First select **<A> Do a System Survey**. This performs a complete survey of your system.

Install the new Windows application as you normally would by following the specific instructions for the program.

Once the new software is installed, run the program as you would with any other Windows application.

When finished running the program, close it by following the specific instructions for the software.

Then select ** Compare Old System to New**. This compares what your system looked like before software installation to how it is afterward.

This last step creates a file called REPORT.TXT. This file shows you all differences between the old system and the new system. This includes all additions, alterations, or other changes made to your system. This report will serve as your guide in undoing any changes made by the software you installed. **BUT, BE CAREFUL, BEFORE YOU REMOVE ANY FILES FROM YOUR SYSTEM MAKE SURE YOU KNOW EXACTLY WHAT YOU ARE REMOVING.**

The *Uninstall for Windows* program is one that has found a definite home on my system. Now, when I want to remove those pesky unwanted programs, I'll have a guide to help prevent me from deleting more than I'm supposed to remove. Sort of an insurance policy to protect me

from myself. Members of Windows OnLine can find [*Uninstall for Windows*](#) as UN4WIN15.ZIP in Directory #150 - (Windows- New Uploads).

Uninstall for Windows 1.5

(Registration: \$19.00; \$28.00 with printed documentation)
