

Installation Notes

Before installation "**ADDRESS MOSCOW 96/97**" you must set Russian screen fonts. Then run **Setup.exe** from CD. It will require about 24MB on you hard disk. If you don't have enough free disk space we suggest run **Setup2.exe**. It will require about 6MB on you hard disk but work not so fast. Setup will create you program group in Program Manager.

Then you must change ADDRESS.INI setting in you installation directory, if necessary.

ADDRESS.INI Settings

You must change the default directory for CD-ROM. It depends on you CD-ROM drive.

[Path] ; Set the default directory for CD-ROM

BASE=*path* ; Set the default directory for files on CD
ADVERIST=*path* ; Set the default directory for graphics files on CD
ADVERTIS1=*path* ; Set the default directory for graphics files on CD

Ex : BASE=D:\BASE
ADVERTIS=D:\ADVERT
ADVERTIS1=D:\ADVERT1
(In this case D: is CD drive letter).

[Options] ; Set Windows Options

Language=1 ; 0 - English
; 1 - Russian

---- Other options set colors and fonts ---

Additionally, there is a "ADDRESS Moscow 96/97" option in the WIN.INI file in your Windows directory which affects performance. This option takes a numeric value. The BrowseGranularity value should be lowered for improved response when instantiating a DataBrowser.

[CA-Visual Objects] ; Set the read-ahead value for the DataBrowser

BrowseGranularity=numeric ; Set the maximum number of records that can reside in memory
; at any one time.

BrowseMaximum=numeric

Loading SHARE.EXE in CONFIG.SYS

If you are using Windows version 3.10, it is necessary to load the DOS SHARE.EXE program to install file sharing and locking capabilities on your system. (If you are using Windows version 3.11 or greater, SHARE.EXE is installed automatically.) To do this, include a line similar to the following in your CONFIG.SYS file:

```
INSTALL=C:\DOS\SHARE.EXE /F:4096 /L:500
```

The values you specify for the /F and /L options will depend on your system (see your DOS manual for details).

If VSHARE.EXE has been provided by Microsoft as part of Word for Windows it should be used instead of SHARE.EXE.

Remember that anytime you make changes to AUTOEXEC.BAT or CONFIG.SYS, you should reboot your computer for the changes to take effect.

Setting FILES in CONFIG.SYS

The recommended FILES setting is at least 128.

Remember that anytime you make changes to AUTOEXEC.BAT or CONFIG.SYS, you should reboot your computer for the changes to take effect.

Setting SMARTDRV.EXE in CONFIG.SYS

It is necessary to load the SMARTDRV.EXE in CONFIG.SYS after you CD-ROM drive.

CTL3DV2 and ToolHelp Conflicts

You may receive a message during installation about a conflict with CTL3DV2 or ToolHelp DLLs. You should choose **Yes** if the file already exists with a more recent date.
