

# Quick Sound

Copyright (C) LaserSoft 1994

This is a cute little program I whipped up in my spare time. It is basically a drag n' drop WAVE file player. It has the abilities to play and delete sound files. So there is the procedure. Choose a file from the file window, and drag it to the speaker icon to play it, to the trash icon to delete it.

In the options menu, you can change the search criteria for the file box on the original form, change what file types it looks for, (i.e. Read only, Archive, Hidden, etc.) and change the appearance of the trash icon. You can change the trash icon into a toilet, trashcan, paperbasket, and an animated flaming barrel.

Questions? Mail them to the address on the register screen.  
Have Fun!!

Please upload this to other BBS's and give copies to your friends. Thanks! :)
