

Wired for Sound Pro 95

Install Notes

To install Wired for Sound Pro 95:

Choose Run from the File menu of Program Manager.
Type *r:\SETUP*, where *r* is the drive letter of your CD-ROM drive.
Press OK.

Although Wired for Sound Pro 95 does not require a sound board, it is *strongly recommended* that you get one. Even Setup will sound better with a Windows-compatible sound card installed!

Note:

Wired for Sound Pro 95 must be installed from within Windows 3.1x or Windows 95. Setup cannot be run from the DOS command prompt.

To access help in most Wired for Sound Pro 95 applications, simply press F1.

Please refer to the Read Me file (README.WRI on the CD-ROM) for last-minute changes and clarifications.
