About Voyetra

Discovering Music provides an intriguing educational environment for exploring the world of music with a multimedia PC. Unlike “encyclopedia-style” CDs that are often no more than books displayed on the screen, Discovering Music brings music to life with a unique combination of creative tools. Its interactive learning environment encourages you to create your own music as you acquire fundamental musical skills.

Discovering Music is fun, easy to use, requires no musical background and works with or without an external MIDI keyboard.

- Take a fascinating tour through musical history.
- Learn the basic concepts that form the foundation of music.
- Create printed musical scores — complete with lyrics.
- Experience the excitement of performing and arranging original songs.
- Hear dynamic symphonic performances of the world’s greatest music.
- Use with or without a MIDI keyboard.
- Requires no musical background.

Click on the titles to learn more about the five modules in Discovering Music:

- [Music Conservatory™](#) — Explore the history of music, music theory and musical concepts in an exciting interactive environment with more than 60 high-quality symphonic recordings and 50 video clips. Includes a Glossary of musical terms and a survey of orchestral instruments.
- [Jammin’ Keys™](#) — Create MIDI music and sound like a pro! Choose from 128 General MIDI instruments and pick a style of music. A virtual five-part band does the rest, adding exciting backups and riffs to your lead. Save your music with the built-in recorder.
- [Recording Station™](#) — Turn your multimedia PC into a desktop recording studio with two digital audio tracks and 10 MIDI tracks. Start with one of the sample MIDI files or play your own melody. Then overdub, mix, modify and add harmony, vocals or acoustic instruments to complete your arrangement. Includes more than 50 MIDI files to get you started.
- [Music Write™](#) — Put your new knowledge of music to work as you create your own songs and print out sheet music on any Windows®-compatible printer. You can move notes, change them, combine them to create chords and even add lyrics.
- [SoundCheck™](#) — A helpful, multimedia diagnostic utility.

[System Requirements](#)

## **System Requirements**

- IBM®-PC or compatible computer running Windows®-3.1 or 95
- 486DX2/66 MHz or higher
- 4 MB RAM minimum (8 MB recommended)
- 6 MB of hard disk space
- 640 x 480, 256-color display
- Double-speed or faster CD-ROM drive
- Windows®-compatible sound card with digital audio and MIDI synthesizer

## **ADDITIONAL RECOMMENDATIONS**

- MIDI-compatible musical keyboard connected to your PC for recording MIDI
- Microphone or line-level sound source for recording digital audio

About  
Voyetra

Since 1975, Voyetra has been in the forefront of music technology. Our software is found on nearly every multimedia PC sold. Voyetra provides custom engineering services to the most prestigious companies in the industry. And Voyetra continues to develop programs and multimedia titles for consumers at every level — from novice to pro.

Our flagship program, [AudioStation](#),<sup>®</sup> an integrated collection of utilities which makes it easy to operate everything a multimedia PC has to offer — MIDI, digital audio and CD audio.

[MIDI Orchestrator Plus](#)<sup>™</sup> turns a multimedia PC into a complete, desktop MIDI recording studio. [Digital Orchestrator Plus](#)<sup>™</sup> breaks new ground by combining a MIDI sequencer with advanced digital audio capabilities.

[MIDI Music Gallery](#),<sup>™</sup> [Digital Sound Gallery™ Volume 1](#) and [Digital Sound Gallery™ Volume 2](#) are CD-ROM collections of high-quality sound files which can be used in musical compositions, presentations and other multimedia projects.

With new CD titles like [Discovering Keyboards](#)<sup>™</sup> and [Discovering Music](#),<sup>™</sup> Voyetra is branching into multimedia “edutainment.” These interactive CDs bring the history, theory and techniques of music to life and help users put their knowledge to work on original multimedia projects.

Begin realizing the full potential of your multimedia computer by looking through this online catalog. We're certain our products will excite you! You'll see why our commitment to quality and innovation has earned us a worldwide reputation as “The Multimedia Sound Specialists.”

To place an order — or for additional information on any of our products — give us a call at 1-800-233-9377. (Outside the United States phone 914-966-0600.)

Information

About  
Voyetra

Digital Orchestrator Plus makes professional desktop music production easy and affordable. This combination of powerful MIDI sequencing and direct-to-disk digital audio recording lets you combine MIDI synthesis with vocals, acoustic instruments, sound effects and real-world sounds. The program also includes digital sound effects processing that would cost hundreds of dollars to create with conventional hardware.

The intuitive drag-and-drop user interface displays MIDI and digital audio tracks side-by-side. Using familiar Windows® commands, you can record, zoom, edit, move, mix or copy MIDI and digital audio tracks with equal ease.

With its professional features, ease of use and seamless integration of MIDI and digital audio, Digital Orchestrator Plus opens the door to new levels of musical creativity and freedom. You'll get more done in less time — and you'll have a whole lot of fun along the way!

- Turn your PC into a multitrack hard disk recording system.
- Create dynamic music using more than 1,000 tracks of MIDI and digital audio data.
- Process multiple tracks of digital audio with reverb, echo, flanging and other dramatic effects.
- Print music from any MIDI file.
- Includes a wide variety of digital audio samples, MIDI music files, drum tracks, and demos.
- On-screen video tutorials help you get started quickly.

- [MIDI Piano Roll Editor](#)
- [MIDI Event Editor](#)
- [Digital Audio Editor](#)
- [Digital Audio Effects Processors](#)
- [Music Notation](#)
- [SoundCheck™](#) (multimedia diagnostic utility)

A full array of features at an affordable price make this the perfect partner for PCs equipped with wavetable synthesis, 16-bit digital audio and/or external MIDI synthesizers.

Step up to the new standard and find out how exciting, easy and affordable professional music production can be!

Use this [Composer's Toolkit™](#) to enrich your Digital Orchestrator Plus™ compositions with a wide selection of musical grooves, riffs, vocals, hits and drum loops.

[System Requirements](#)

## **System Requirements**

- IBM®-PC or compatible computer running Windows®-3.1 or 95
- 486 DX2/66 or higher 8 MB RAM
- Minimum 10 MB of hard disk space
- Sound card with digital audio record/playback and MIDI synthesizer (or MIDI interface with external MIDI synthesizer)
- Microphone or line-level sound source for recording digital audio
- Program available on CD-ROM and 3.5" diskettes  
Additional companion files on CD-ROM only

Information

About  
Voyetra

MIDI Orchestrator Plus turns a multimedia PC into a complete desktop MIDI recording studio. Create multitrack MIDI recordings of your own music or modify pre-recorded MIDI songs. Convenience features include Quick Keys to switch instantly between different views of the song, multiple-level Undo/Redo on all editing operations and an easily accessible Notepad for adding descriptive text to the song file.

Work at your own pace. Compose songs step-by-step by entering notes with a mouse or MIDI keyboard. Then edit every detail on the PC screen. You can even print out sheet music for yourself and others to enjoy!

Whether you're a beginner or an accomplished musician — even if you can't read a note — with MIDI Orchestrator Plus you'll be able to compose and play professional-sounding music right from the start!

- Turn your PC into a multitrack MIDI music workstation.
- Create dynamic music using more than 1,000 tracks of MIDI data.
- Print music from any MIDI file on treble clef, bass clef or grand staff.
- Includes a wide variety MIDI music files, drum tracks, video demos and more!

Information

About  
Voyetra

MIDI Music Gallery is a music lover's dream! This impressive collection of music files transforms your multimedia PC into a personal orchestra with an almost endless repertoire.

You don't need any musical ability to enjoy MIDI Music Gallery. Use the songs just as they are to learn about musical styles and eras, to create multimedia presentations, to liven up parties and sing-alongs — or just listen and enjoy them as you work on your PC.

If you're an accomplished musician, the library will speed your work by providing finished material to use as a starting point for your own compositions. Use your MIDI sequencer to alter instruments, tempos and notes, or even add your own parts.

For novice or pro, there's no better way to tap the MIDI musical power in your multimedia PC.

- A convenient and versatile MIDI library for any computer music application.
- Saves time and money by providing easy access to a wide variety of musical styles.
- Excellent music companion for [Digital Orchestrator Plus](#),™ [MIDI Orchestrator Plus](#),™ [Discovering Music](#)™ and [Discovering Keyboards](#).™
- [Gallery Guide](#)™ makes it easy to locate, audition and manage songs.

MIDI Music Gallery contains a variety of styles to suit every taste or musical application, including:

### ***Production Music***

More than 30 selections for promo spots, background music, and multimedia productions.

Action Themes / Ballads / Blues / Comical / Country / Fifties Rock / Funk / Image / Jazz / Mood Themes / Reggae / Techno Pop

### ***Drum Tracks***

50 commonly used drum tracks — not simple four beat patterns, but professional arrangements complete with “fills and licks.” Avoid wasting creative time “banging in” drum parts. Styles include:

Ballad / Bossa Nova / Country / Disco / Funk / Jazz / Heavy Rock / Mambo / Merengue / Pop / Reggae / Rhumba / Rock / Samba / Shuffle / Techno Pop / Waltz

### ***Signature Styles***

The Signatures Edition captures the moods and sonic signatures of each of these eras:

**The '50s:** (10 songs) — Signature songs that capture the era's ballads, do-wops, and dance tunes.

**The '60s:** (7 songs) — A cross-section from the California style to the psychedelic subculture.

**Liverpool:** (20 songs) — The Golden Age of British Rock in rock tunes, ballads and standards.

**The '70s:** (7 songs) — The disco and dance era lives again.

**The '80s:** (7 songs) — Synthesizers and robotic rhythms bring back the realm of '80s dance, pop and ballads.

**Motor City Sounds:** (17 songs) — The soulful, fun, funky and dance oriented styles of the Motor City in the late '50s and '60s.

**Big Bands:** (6 songs) — Big band swing, be-bop, swing tunes and sentimental love themes.

**Country:** (8 songs) — The upbeat country style that evokes the spirit of America's heartland.

**Standards:** (6 songs) — Bring back the moods of the music that stands the test of time.

**TV Themes:** (21 songs) — The feeling of TV themes with sitcom / comedy show styles, western styles and action show styles.

### **System Requirements**

## **System Requirements**

- IBM®-PC or compatible computer running Windows®-3.1 or 95
- CD-ROM drive
- Sound card with internal MIDI synthesizer or external MIDI synthesizer with interface
- Compatible with all major MIDI sequencers and other software capable of playing MIDI music files
- Compatible with Voyetra's Digital Orchestrator Plus,™ Discovering Music™ and Discovering Keyboards™

About Voyetra

### Volume 2: Composer's Toolkit™ for Digital Orchestrator Plus™

Composer's Toolkit contains a wealth of custom groove variations, intros, fills, real drum patterns and music samples to enhance your Digital Orchestrator Plus music compositions. Just drag-and-drop these digital tracks to assemble exciting musical compositions with a realistic feel — instantly.

There's no easier way to create music with digital and MIDI grooves!

- Easily create exciting digital audio music compositions.
- Enhance MIDI music compositions with musical sound effects.
- Instantly assemble rhythm grooves using digital audio drum tracks.
- **Requires Voyetra's [Digital Orchestrator Plus](#).™**

The Composer's Toolkit provides a variety of musical Construction Kits — WAV files and song files in Digital Orchestrator Plus (\*.ORC) format — which group loops and musical samples of common genres. The CD includes:

#### Music Construction Kits

More than a dozen sets of musical grooves and riffs composed in the same tempo and key. Use these "musical templates" to paste individual elements together into complete songs. Styles include Rock, Funk, Dance, Techno, Blues and more.

#### Drum Loops

Hundreds of drum loops and samples in various styles: Hip Hop, Industrial, Techno, New Age, Ambient, Rock, Jazz, Latin and Pop.

#### Musical Hits & Riffs

A wide variety of musician-oriented samples such as orchestra hits, percussion, vocals, guitar riffs and more.

#### Single Drum Hits

Dozens of digitally-recorded drum beats and drum hits.

#### [System Requirements](#)

## **System Requirements**

- IBM® PC or compatible computer running Windows® 3.1 or 95
- CD-ROM drive
- 16-bit Windows®-compatible digital audio sound card
- Digital audio (WAV) files are in 16-bit digital audio at 22.05 kHz sample rate

### **NOTE**

- Requires Voyetra's Digital Orchestrator Plus™ (sold separately)

## Gallery Guide™

Finding the right sound is easy with the Gallery Guide file browser included with Volume 1 of Digital Sound Gallery.

Just select a category and play a sample of each selection. When you find the sound you want, click the Copy button to transfer it to your hard disk.

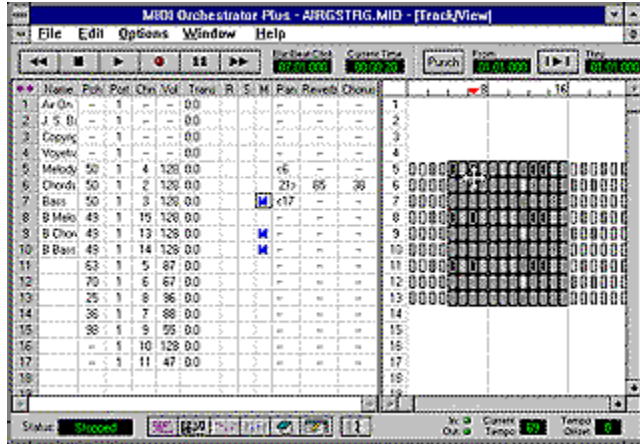

## MIDI Mixer

This intuitive “audio mixer” control panel shows MIDI activity in 16 channels on any MIDI port.

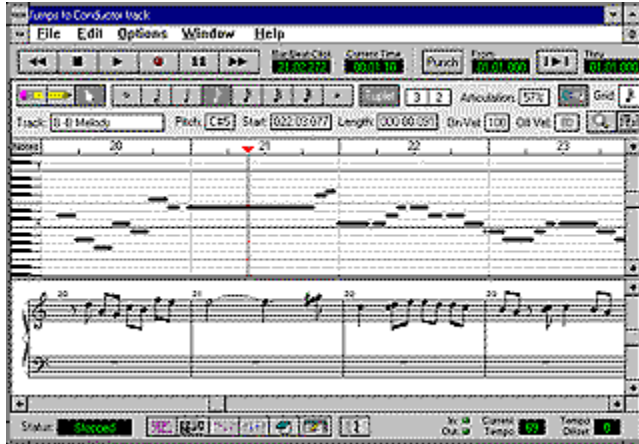

- Re-orchestrate music as you listen.
- Change instrument assignments, volumes, track names, key transposition, tempo and other settings.
- Single out specific instruments with Mute and Solo buttons.
- Each channel also includes a Pan controller and two extra dials that you can assign to various MIDI controllers, such as Chorus or Reverb.

## MIDI Track Editor

- Record multiple MIDI tracks from any MIDI port, then rearrange song structure with full editing controls.
- Copy, move or delete a single track or any range of measures and tracks with simple drag-and-drop commands.
- Control volume, panning, channels, patches and more.
- View track data as numerical values or in easily recognizable formats such as patch names, volume sliders, etc.

## MIDI Piano Roll Editor

- Arrange and edit MIDI notes of any duration with simple point, click, drag, cut, copy and paste.
- Double-click any note to see and edit every MIDI parameter — velocity, duration, pitch, etc.
- Music notation updates automatically as you edit.
- Insert notes of any duration — including triplets — with a point and click.
- Grid feature quantizes notes as they are added.
- Zoom to any magnification, from an individual note to the entire song.

## MIDI Event Editor

With the MIDI Event Editor you can view and edit every detail of any MIDI event, including controller parameters, key signature, tempo and more.

- Filtering options enable you to quickly locate events by type.
- Conductor track lets you place tempo changes anywhere in the song.

## Music Notation

Music Fun & Learning

Multimedia Utilities

Recording & Composing

Order Information

About Voyetra

- Convert MIDI data into standard music notation and print sheet music on any Windows® compatible printer.
- Set transcription options independently by track.
- Choose treble, bass, alto, and tenor clefs, drums, grand staff or auto select.
- Preview your score on screen with variable zoom.

## Mixer

An intuitive mixer-style control panel shows MIDI activity in 16 channels on any MIDI port.

- Re-orchestrate music as you listen by changing instrument assignments, volumes, track names, key transposition, tempo and other settings.
- Single out specific instruments with Mute and Solo buttons.
- Each channel also includes a Pan controller and two extra dials that you can assign to various MIDI controllers, such as Chorus or Reverb.

## MIDI and Digital Audio Track Editor

- Record multiple digital audio tracks or import WAV files and place them side-by-side with MIDI data for fast editing.
- Arrange MIDI and digital audio tracks on the screen in any order you wish.
- Import MIDI or digital audio from other files and export multiple tracks of digital audio into mixed stereo WAV files.
- Full editing controls let you copy, move and merge tracks with simple drag-and-drop commands.
- Control volume, panning, channels, patches and more.

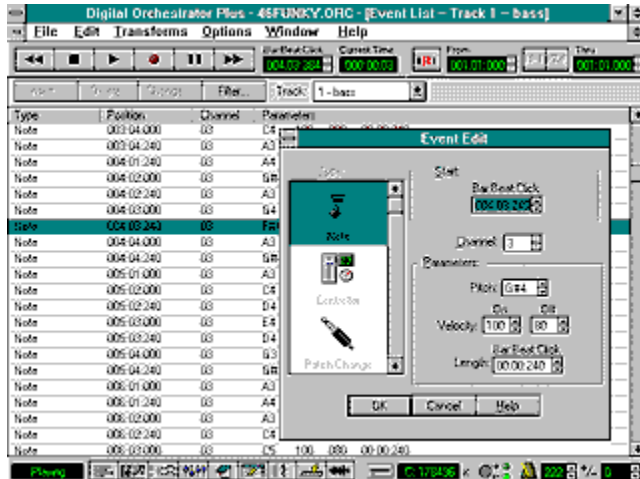

## Piano Roll Editor

- Arrange and edit MIDI notes with simple point, click, drag, cut, copy and paste.
- Double-click any note to see and edit MIDI parameters such as velocity, duration and pitch.
- Insert notes of any duration — including triplets — with a point and click.
- Grid feature quantizes notes as they are added.
- Zoom to any magnification — from an individual note to the entire song.
- Music Notation window updates automatically as you edit notes in Piano Roll window.
- Includes dozens of MIDI Transforms, including: Humanize, Scaling, Offset, Randomize, Invert, Transpose, Diatonic Transpose and more.

## Event Editor

- Double-click to view and edit every detail of any MIDI event, including controller parameters, key signature, tempo and more.
- Filtering options quickly locate events by type.
- View MIDI data in any track — including the Conductor track — to change key, tempo or meter anywhere in the song.

## Digital Audio Editor

- Zoom in on any digital audio track for fast and intuitive drag-and-drop editing.
- Cut, copy and move or delete song sections easily with the mouse.
- Import WAV files — such as drum samples or sound effects — and place them “right on the beat” with the Snap-to-Grid feature.

## Digital Audio Effects Processor

Just highlight any section of a Digital Audio track with the mouse, click on a menu, and you're ready to add digital sound effects processing!

- Pre-defined effects include Echo, Reverb, Chorus, Flange, Gate/Compressor and others.
- Generate your own custom digital effects and save them to use any time you wish.

About  
Voyetra

Discovering Keyboards is the perfect software companion for the multimedia PC equipped with a MIDI keyboard.

More than just piano lessons on a CD, Discovering Keyboards provides a well-rounded multimedia environment for learning basic keyboard skills and offers a comprehensive overview of MIDI technology and the history of keyboards.

By utilizing all of the interactive features of today's multimedia PCs, Discovering Keyboards makes it easy for beginners to play and read music right away. Experience the fun of performing with the interactive Songbook. Reinforce your musical skills with three educational music games.

Computers, MIDI and synthesizers make it easier than ever to create professional-sounding music. Discovering Keyboards provides a quick, easy and fun way to learn how!

- Learn how to play the keyboard — regardless of your musical skill.
- Play along with on-screen music — your PC serves as a backup band.
- Print out the music that you've learned to play.
- Explore the history of musical keyboards.
- Learn about the fundamentals of MIDI and digital audio technology.
- Import MIDI music to build your repertoire.
- Reinforce musical skills with interactive games.

Take a look at Discovering Keyboard's multi-screen interface by clicking on the titles below:

- [Keyboard Tour](#) — offers a history of keyboard instruments through text, photographs, videos and sound.
- [Understanding MIDI & Synthesis](#) — provides a multimedia overview of PC sound technology — complete with audio examples and a comprehensive glossary.
- [Keyboard Lessons](#) — is a beginning piano course taught by a professional music teacher. Learn basic music notation, theory and playing techniques while the computer tracks and evaluates your progress.
- [Songbook](#) — stores the wide variety of tunes that come with the program. You can listen to the songs, play the songs with background accompaniment and import your own MIDI files and print them — complete with note names.
- [Game Room](#) — lets you test what you've learned with three, fun "video"-style games which can be played by 1 or 2 users.
- [SoundCheck™](#) — is a helpful, multimedia diagnostic utility.

### [System Requirements](#)

## **System Requirements**

- IBM® PC or compatible computer running Windows® 3.1 or 95
- 486DX2/66 MHz or higher
- 8 MB RAM
- 6 MB hard disk space
- 640 x 480, 256-color display
- Double-speed or faster CD-ROM drive
- Windows®-compatible sound card with 16-bit digital audio
- MIDI-compatible musical keyboard connected to your PC

Recording & Composing

Order Information

About Voyetra

An interactive guide to the fundamentals of creating, editing and playing music on the computer.

- Learn how PCs make music.
- Listen to sample MIDI and WAV files.
- Includes a Glossary of more than 100 important terms from the worlds of MIDI and musical synthesis.

## Keyboard Lessons

Music Fun & Learning

Multimedia Utilities

Recording & Composing

Order Information

About Voyetra

Keyboard learning has never been more enjoyable!

- A professional teacher introduces basic music notation, theory and playing technique in a series of video clips and exercises.
- The interactive training system provides analysis and feedback in each lesson and tracks your progress.
- Once you've learned a song, click on Performance to play it with background accompaniment.

# Songbook

This on-screen Songbook has a wide variety of songs.

- Includes classics, folk tunes, holiday and patriotic songs, and more.
- Sort songs by title, style, composer or level of difficulty.
- Display and print songs as sheet music — complete with note names and fingering — on any Windows®-compatible printer.
- Access the Performance screen where you can play along with background accompaniment.
- Import your own MIDI song files — and even print out with note names.

## Music Game Room

Have fun with three, exciting, arcade-style games that help build your musical skill.

- Music Quiz™ is a multiple choice game that tests your knowledge on general musical topics.
- Note Blaster™ is an action game that sharpens your ability to recognize notes on the staff.
- Rhythm Master™ is a multiple choice game that quizzes your ability to match the rhythms you hear with what you see on the screen.

## AudioStation®

AudioStation lets you run your multimedia PC just like a home stereo system. An intuitive, hardware-style interface unites your computer's MIDI, WAV, and CD functions so they're easy to control and fun to use. You'll find it's a welcome alternative to the separate utilities (Media Player, CD Player, Sound Recorder and Volume Control) supplied with Windows.®

AudioStation lets you edit MIDI and digital audio WAV files and group your favorite files into playlists for easy, automated playback. You can also play audio CDs with your CD-ROM drive and create custom playlists of your favorite songs — complete with CD titles and song names.

As an added bonus, AudioStation includes dozens of MIDI music and digital audio files, plus a diagnostic program to help you find and fix common multimedia setup problems.

- Control your PC audio functions just like a home stereo.
- Use your PC's CD-ROM drive to play audio CDs.
- Create custom playlists of audio files.
- Audition digital audio (WAV) and music (MIDI) files.
- Add echo and other effects to sound files.
- Modify MIDI files.
- Diagnose audio problems.

AudioStation includes the following components:

- [MIDI Orchestrator™](#)
- [AudioView™](#)
- [SoundCheck™](#)
- [AudioStation](#)

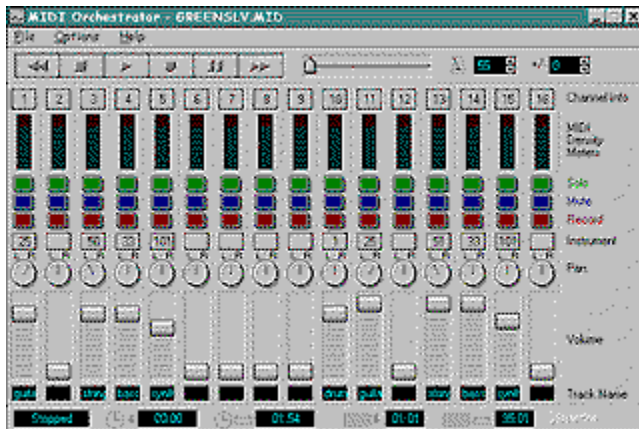

### [System Requirements](#)

## AudioStation

- Control your PC audio functions just like a home stereo.
- Use your PC's CD-ROM drive to play audio CDs.
- Create custom playlists of audio files.

## MIDI Orchestrator™

- Reorchestrate MIDI music with an intuitive 16-channel “audio mixer”-style control panel.
- View MIDI data activity and change instruments, volumes, transposition, tempo and other song settings in 16 MIDI channels.
- Single out individual instruments while playing songs.
- Lengthen and shorten MIDI songs by varying the tempo while viewing the corresponding change in song time.
- Record MIDI songs or new instrument parts from any MIDI keyboard.

## AudioView™

- Edit WAV files using cut, paste, copy and continuously variable zoom.
- Record files of virtually unlimited length directly to the hard drive.
- Modify WAV files with sound effects: echo, reverse, fade, and more.
- WAV file conversions include half sample rate, stereo to mono and more.
- Embed WAV files by dragging icon into documents or load WAV files by dragging file name into AudioView.
- Open multiple instances to edit between several WAV files.

## **System Requirements**

- IBM® PC or compatible computer running Windows® 3.1 or 95
- 486DX2/66 MHz or higher
- 4 MB RAM (8MB recommended)
- 5 MB hard disk space
- 640 x 480, 256-color display
- Double-speed or faster CD-ROM drive
- 16-bit Windows®-compatible sound card

## **ADDITIONAL RECOMMENDATIONS**

- MIDI-compatible musical keyboard with PC interface to record MIDI
- Microphone or line-level sound source to record digital audio

## Computer Music Starter Kit™

Voyetra's Computer Music Starter Kit turns your multimedia PC and MIDI keyboard into a desktop music system. Just connect the MIDI cable to your sound card's joystick port, plug in your MIDI keyboard, load the CD-ROM and you're ready to play.

Creating MIDI music compositions is as easy as operating a tape recorder. MIDI Orchestrator Plus,™ a full-featured sequencer program, lets you record, edit and play MIDI music, as well as print sheet music. Jam Grid,™ an interactive music utility, lets you create songs with just a few clicks of the mouse. You even get a multimedia course on MIDI and music synthesis along with a wide variety of songs to help you get started right away.

There's no easier way to enjoy the fun of making music with your computer!

- All-in-one solution for desktop music production.
- MIDI Sequencer for recording and editing music.
- Print sheet music on any Windows-compatible printer.
- Includes Jam Grid™ — an interactive composer — for easily creating songs regardless of your musical skills.
- Multimedia tour of MIDI and music synthesis.
- MIDI cable to connect your PC and MIDI keyboard.
- Includes a wide variety of MIDI files to get you started.

Voyetra's Computer Music Starter Kit includes everything you need to turn a multimedia PC and MIDI keyboard into a desktop music system:

- Jam Grid™ — Automatic Music Generator
- MIDI Orchestrator Plus™ — MIDI Sequencing Program
- Understanding MIDI and Synthesis™ — Interactive Tutorial
- PC MIDI Cable

### System Requirements

## Jam Grid™

- Create music instantly — simply by clicking on the grid with your mouse.
- Choose from a wide variety of styles including Rock, Jazz, Latin and more.
- Add professional-sounding fills and endings.
- Save your songs and load them into MIDI Orchestrator Plus™ to edit the music or add more parts.

## MIDI Orchestrator Plus™

- A full-powered MIDI sequencer lets you record, play and edit MIDI music with any MIDI keyboard.
- Record MIDI tracks one instrument at a time to build a song.
- Arrange and edit MIDI notes using standard Windows commands such as point, click, drag, cut, copy and paste.
- Rearrange song structure with full editing controls to delete, move or copy an entire track or range of measures and tracks.
- Convert MIDI data into standard music notation and print music scores on the treble clef, bass clef and grand staff.
- Piano Roll view displays MIDI data on a graphical timeline, clearly showing the pitch, position and duration of each note.
- Double-click each note to view and edit MIDI data such as velocity, duration, note value, and more.
- MIDI Event view shows the finest details in the MIDI data.
- Display MIDI data as musical notes, showing the relationship between MIDI data and traditional music.
- Create and print scores on any Windows®-compatible printer.

## Understanding MIDI and Synthesis™

- A guide to the fundamentals of creating, editing and playing music on the computer.
- Covers MIDI and synthesizer hardware and configurations as well as the essentials of computer-generated music reproduction.
- Sample MIDI and WAV files let you hear what the technology sounds like.
- Comprehensive glossary provides definitions of more than 100 important terms.

## PC MIDI Cable

- Converts your sound card's joystick connector into a MIDI port for connecting external music synthesizers and keyboards.
- Compatible with all major sound cards and MIDI keyboards.

## **System Requirements**

- IBM® PC or compatible computer running Windows® 3.1 or 95
- 486DX2/66 or higher
- 4 MB RAM minimum (8 MB recommended)
- 5 MB hard disk space
- 640 x 480, 256-color display
- Double-speed or faster CD-ROM drive
- Windows®-compatible sound card with MIDI synthesizer or an external MIDI synthesizer connected to your PC
- MIDI-compatible musical keyboard required for recording MIDI

### **NOTE**

To use the enclosed MIDI connector cable, your sound card must be equipped with an industry-standard 15-pin joystick/MIDI connector.

## Jammin' Keys™

With Jammin' Keys, anyone can create professional-sounding songs — regardless of musical skill! Simply press the Start button and you're jammin! A five-part band accompanies your lead with drums, bass, rhythm, and lead parts. Guide the music by clicking on the Jam Grid or the on-screen keyboard. Click on the drum pads to trigger sound effects and record your performance to enhance it with Recording Station or other MIDI sequencers.

- Instantly create music using your PC as a virtual backup band.
- Choose from a wide variety of styles including Rock, Jazz, Latin and more!
- Add professional-sounding fills and endings.
- Conduct the music by clicking the "Jam Grid" or the on-screen music keyboard.
- Add sound effects with the drum pads.
- Use the mixer to adjust instrument levels as the song plays.
- Record your song as a MIDI file and load it into Recording Station or a MIDI sequencer to edit or add more parts.
- Also includes value-packed extras to help get you started — such as a video tutorial and dozens of sample sound effects.

Click here to view the [Jammin' Keys](#) screen.

[System Requirements](#)

## **System Requirements**

- IBM® PC or compatible computer running Windows® 3.1 or 95
- 486DX2/66 MHz or higher
- 4 MB RAM minimum (8 MB recommended)
- 1 MB of hard disk space
- 640 x 480, 256-color display
- Double-speed or faster CD-ROM drive
- 16-bit Windows®-compatible sound card with MIDI synthesizer
- 15-pin joystick connector and PC MIDI interface cable required for controlling Jammin' Keys with an external MIDI keyboard

## Multimedia Audio Accessories Kit™

The Multimedia Audio Accessories Kit is a set of well-integrated, user-friendly utilities and applications to help you maximize the creative potential of your multimedia PC. This feature-rich software suite lets you schedule appointments with text messages and audio alarms on a desktop wallpaper calendar, embed your voice in documents or spreadsheets, add MIDI music to standard Windows® screen savers, add sounds to Windows system events, create multimedia presentations quickly and easily, manage your multimedia images, and even troubleshoot your system. Because these applications were all designed to work the same way, you'll find them easy to learn and use.

Click on the titles to learn more about the modules in the Multimedia Audio Accessories Kit:

- [ImageStation™](#) — Multimedia Image Manager
- [Audio Calendar™](#) — Audio Scheduler and Alarm
- [WinDAT™](#) — Digital Audio Editor
- [MIDI Screen Saver™](#) — MIDI Player for the Windows® Screen Saver
- [Say It!™](#) — Voice Annotation Applet
- [Sound Script™](#) — Multimedia Presentation Utility
- [MediaCheck™](#) — Multimedia Diagnostic Utility

## ImageStation™

### Multimedia Image Manager

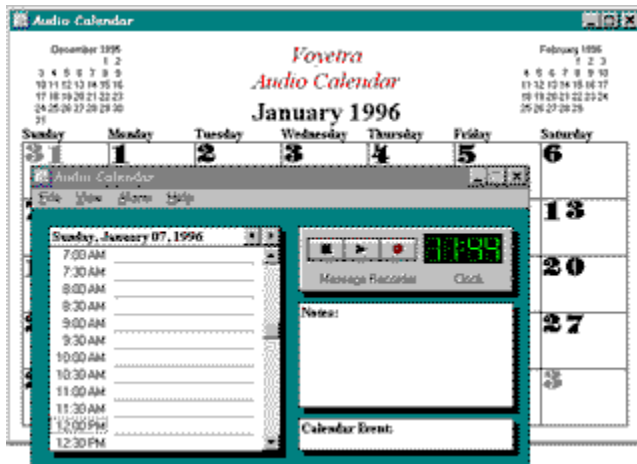

ImageStation makes it convenient and fun to manage and view a wide variety of image files and create your own audio/visual slide shows.

- Select, view, catalog and manage thumbnail versions of image files with annotations.
- Supports most major image format types including Kodak Photo CD, TIFF, PCX, BMP, GIF, EPS, JPEG and more.
- Playlist window lets you assemble and save a group of images in any order.
- Add narration and MIDI music to create slide show presentations.
- In addition to full screen mode, annotations and thumbnail versions of each image are provided to enable easy viewing, selection, and cataloging of images.
- A starter collection of images in several formats is included.

## Audio Calendar™

## Audio Scheduler and Alarm

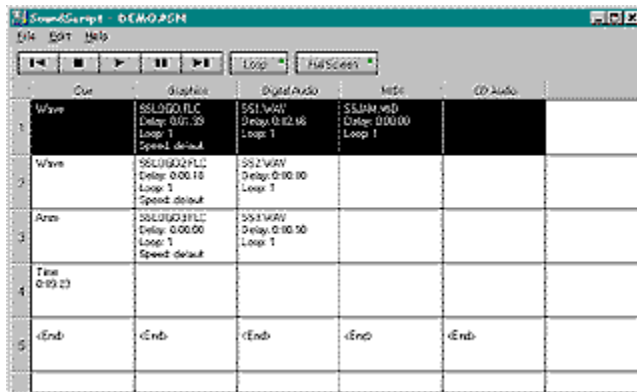

Having trouble keeping on schedule? Let Audio Calendar help!

- See a full month of appointments on an intuitive "desktop blotter" calendar that replaces your desktop wallpaper.
- Create daily appointments that include text messages, voice annotation and audio alarms.
- Insert a special event title for each day.

## SoundScript™

### Multimedia Presentation Utility

	Cue	Graphics	Digital Audio	MIDI	CD Audio
1	Wave	SS1.G01.FLC Delay: 0:07.39 Loop: 1 Speed: default	SS1.WAV Delay: 0:02.98 Loop: 1	SS1.MID Delay: 0:00.00 Loop: 1	
2	Wave	SS1.G02.FLC Delay: 0:00.10 Loop: 1 Speed: default	SS2.WAV Delay: 0:00.00 Loop: 1		
3	Arm	SS1.G03.FLC Delay: 0:00.00 Loop: 1 Speed: default	SS3.WAV Delay: 0:00.00 Loop: 1		
4	Time	0:09.23			
5	<End>	<End>	<End>	<End>	<End>

Look at what you can do with SoundScript:

- Create presentations quickly and easily.
- Combine MIDI, .WAV, CD audio sound with Autodesk Animator,™ 3-D Studio,™ Animator Pro,™ and BMP bit mapped graphics.
- Simultaneously show animations, play digital audio voice-overs and add MIDI or CD music.
- View presentations in a window or in full-screen mode.
- Loop presentations to play continuously — for kiosks or on-going demos.

Say It!™

### Voice Annotation Applet

Say It! makes it easy to embed voice annotations into documents and spreadsheets instantly!

- Choose the place, press, a hot-key combination and speak into your microphone.
- Can be installed into the Windows® Startup Group, so it starts minimized and is ready to run from any application.
- Recorded messages can be edited with Voyetra's Audioview™(sold separately).

## WinDAT™

### Digital Audio Editor

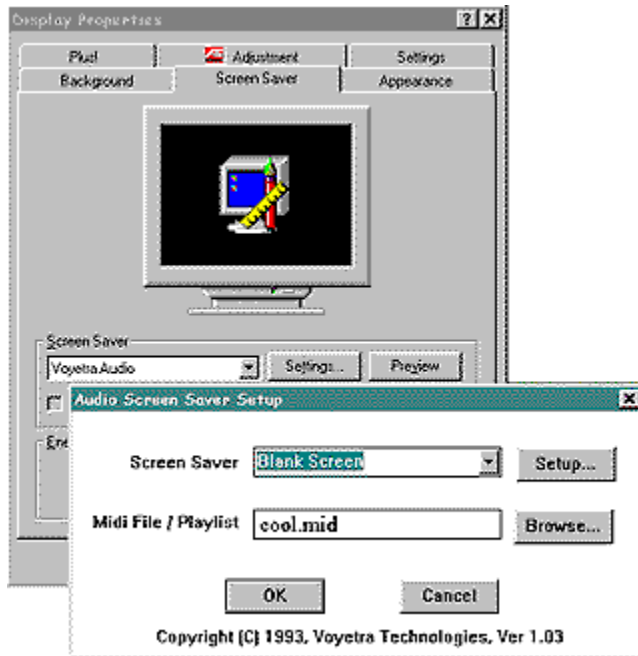

- Edit WAV files using cut, paste, copy and continuously variable zoom.
- Record files of virtually unlimited length directly to the hard drive.
- WAV file conversions include half sample rate, stereo to mono and more.
- Embed WAV files by dragging icon into documents or load WAV files by dragging file name into AudioView.
- Open multiple instances to edit between several WAV files.

## MIDI Screen Saver™

### MIDI Player for the Windows® Screen Saver

MIDI Screen Saver adds the dimension of MIDI music to the Windows screen saver.

- Play a single MIDI song file or an [AudioStation®](#) MIDI file playlist as a background to the screen saver graphics.
- Compatible with standard Windows screen savers.
- For a full selection of compatible MIDI files, see Voyetra's [MIDI Music Gallery](#).

## Music Write™

Music Write is the perfect way to see and hear how written notation translates into real music. Creating and printing sheet music is a breeze — even for beginners! Play an external MIDI keyboard and see the music automatically transcribed onto the screen. Or just drag notes and musical symbols onto the musical staff with your mouse. Play your composition, type in lyrics, and print sheet music! To help you get started, there are dozens of ready-to-play music files.

- Write music by using your mouse to place notes and other musical symbols.
- Record music from your MIDI keyboard and see it converted into music notation.
- Play back the on-screen music using your PC sound card or an external MIDI synthesizer.
- Print the music, complete with title, copyright and lyrics on any Windows® compatible printer.
- See and hear dozens of classical masterpieces included with the program.
- Also includes a video tutorial to help you get started.

Click here to view the [Music Write](#) screen.

[System Requirements](#)

## **System Requirements**

- IBM® PC or compatible computer running Windows® 3.1 or 95
- 486DX2/66 MHz or higher
- 4 MB RAM minimum (8 MB recommended)
- 1 MB of hard disk space
- 640 x 480, 256-color display
- Double-speed or faster CD-ROM drive
- 16-bit Windows®-compatible sound card
- 15-pin joystick connector and PC MIDI interface cable required for recording music with an external MIDI keyboard

## Recording Station™

Record songs on your multimedia PC the way it's done in a real recording studio. Recording Station lets you combine digital audio and MIDI tracks to create musical arrangements that include synthesizers, voices, acoustic instruments and other real-world sounds. Record from any MIDI compatible keyboard — or load one of the many MIDI compositions included — and experiment by reorchestrating the music.

- Create songs on your PC the way it's done in a real recording studio.
- Record individual instrument sounds with your MIDI keyboard to build up a song one part at a time.
- Add voice or acoustic instruments while listening to the MIDI music.
- Two audio tracks let you add harmonies and background vocals by singing along with your own voice.
- Includes a wide variety of songs you can instantly load and play.
- MIDI portion of the song is played by the sound card's synthesizer or an external MIDI synthesizer. Digital audio is played by the sound card's WAV audio hardware.
- Also includes value-packed extras to help get you started, such as a video tutorial, MIDI drum tracks, and sample song files complete with lyrics.

Click here to view the [Recording Station](#) screen.

### [System Requirements](#)

## **System Requirements**

- IBM® PC or compatible computer running Windows® 3.1 or 95
- 486DX2/66 MHz or higher
- 4 MB RAM minimum (8 MB recommended)
- 1 MB of hard disk space
- 640 x 480, 256-color display
- Double-speed or faster CD-ROM drive
- 16-bit Windows®-compatible sound card with MIDI synthesizer
- 15-pin joystick connector and PC MIDI interface cable required for recording music with an external MIDI keyboard

## Teach Me Piano™

- Learn how to play the keyboard — regardless of your musical skill.
- Learn at your own pace — with more than 160 lessons and 115 exercises.
- Play along with on-screen music — your PC serves as a backup band.
- Print out the music that you've learned to play.
- Import and play along with your own MIDI music part.
- Learn about music theory as you play.

## MediaCheck™

MediaCheck provides an easy way to test and troubleshoot the multimedia features of your computer.

- A series of displays takes you step-by-step through the testing process. If, for some reason, one of the multimedia devices is not working, MediaCheck confirms there is a problem and provides troubleshooting tips to help you get the system up and running again.
- Includes a video tutorial on how to connect a MIDI keyboard.
