

# Axialis MediaBrowser 4.0

## Multimedia Browser and File Manager for Windows

Shareware Version for Windows 98, Millenium & 2000

Build 4.00 - July 18, 2000

### What is Axialis MediaBrowser?

**Axialis MediaBrowser®** is a powerful tool designed to **search, manage and view or play** media files. It has a **fully integrated workspace** that permits you to work efficiently and **manage your media files with ease**. It is compatible with **more than 50 file formats: Video files** (AVI, ASF, MPEG, MOV, RAM...), **Image Files** (BMP, JPEG, PNG, GIF, TIFF, PSD, QTI...), **Sound and Music Files** (MP3, WAV, MID, MOD, S3M, WMA...), **Animations** (FLI, FLC, Animated GIF...), **Web Files** (HTM, DHTML, ASP...), **Icons and Cursors** (ICO, CUR, ANI, ICL...) and more...

**Axialis MediaBrowser®** has been designed to let you **easily manage your media files**. It will be very helpful to you to organize and retrieve your favorite media files. But that's not all! It will also be your daily companion to **view, play and print** your **images, movies and sounds...** With it's built-in **thumbnail explorer** (with image and movie previews), browsing your computer folders for media files will be a child's play! You can even **create slideshows** that mix several media types. It includes so many features! For example you can **print a folder contents as thumbnail** or print an image and **create a large poster...**
