Dear

Congratulations! Your store has been selected for the second edition of our guide to the best sporting goods stores in the world. The author and our team of 60 adventurers have completed an extensive process of evaluating over 160 stores not listed in our first edition. We are very pleased to inform you that your store meets our rather stringent criteria and has been selected as one of the world's best sporting goods stores.

Sincerely,

Chris Jonson
Managing Editor

The modern bicycle took shape between 1839 and 1888. Its popularity brought about major improvements in roads in many parts of the world during the nineteenth century. In many countries, the bicycle continues to be far more widely used than the automobile.

The development of the bicycle influenced other fields of transportation. For example, the first airplane was built by bicycle mechanics, and it was held together with bicycle cement.

A Time Line for Bicycles

The world's most prestigious bicycle race covers 2,000 miles in 21 days; the margin of victory is often as little as two minutes.
