Microsoft FoxPro 2.5 for Windows

Redefines Performance Expectations In a Database for Windows.

With Microsoft FoxPro 2.5, you'll discover overall speed gains: FoxPro 2.5 is *up to three times faster* than FoxPro 2.0 in multi-user and multi-table operations. Visually create screens that take advantage of Windows, including fonts, pictures, and colors that make the screen easier to work with. All without the tedium of writing code. Share applications and data in the MS-DOS, Macintosh, and UNIX versions of FoxPro 2.5. View data in different ways with the Browse tool, all the while experiencing the ease of use that Windows offers.

FoxPro 2.5 -- Easy To Learn and Use

Tap into the graphics capabilities of Windows, including TrueType fonts, pictures, and sound. Then integrate data with other Windows-based applications through *dynamic data exchange* (DDE).

Program In Windows -- Instantly

Talk about making it easier. You can run all existing applications in Windows without modifying code. Open up to 225 work areas simultaneously, and build sophisticated programs for Windows using the award-winning and productive FoxPro power tools.

Use an Application Across Multiple Platforms

Create data or an application with FoxPro 2.5 for Windows, and use it on any personal computer running the MS-DOS, Macintosh, or UNIX operating system. Enjoy complete multi-user functionality: all platforms can share the same data simultaneously.

Minimum System Requirements:

CPU: 80386sx or higher

RAM: 4 MB

Hard disk space: 15 MB

Graphics card/monitor: VGA or higher

Mouse: Required

Operating system: DOS 3.1 and Windows 3.0 (386 enhanced mode)

Other: For network operations, network software that supports a NetBIOS, and a server with a hard disk
