Microsoft TrueType Font Pack   1.0
44 Ways to Look Good on Paper

It's easy to create high quality documents with the TrueType Font Pack.   A perfect addition to the selection of fonts included in version 3.1 of the Microsoft Windows operating system, TrueType Font Pack is ready to use with all your applications for Microsoft Windows.   Font Pack is incredibly easy to install and use because TrueType is the only font technology *built into* Windows.   The same font is used for both screen display and output, so what you see on the screen matches what you'll get from the printer -- beautiful, professional-quality type that looks great both on-screen and printed.

A Few Highlights

44 scalable TrueType fonts, in any size you want, to add to your Windows operating system version 3.1.

Compatible with all types of printers -- PCL-type or PostScript laser, ink jet, or even dot matrix -- to give you high quality output right out of the box!   In most cases, printing with True Type fonts is even faster than with printer-resident fonts.
