## Lotus 1-2-3® for Windows Release 4

### It's Never Been Easier To Use a Spreadsheet!

Presenting Lotus 1-2-3 Release 4, the easiest Windows spreadsheet ever built. It features bold new technology to maximize your productivity, whether you work on your own, or in a group. 1-2-3 Release 4 provides tight integration across the Lotus suite of Windows applications to make Working Together a breeze. Plus, count on superior 1-2-3 compatibility for the smoothest move to Windows yet. Just see for yourself what 1-2-3 Release 4 can deliver for you!

### Maximize Your Productivity

1-2-3 Release 4's context-sensitive interface provides instant access to the menus and SmartIcons appropriate for each task. The new drag-and-drop feature allows you to move or copy cells, ranges, formulas, and charts. Our one-step Charting feature allows you to create a chart complete with titles, labels, and legends in a signal step. Edit right in place! Another new feature we have added is QuickMenus. Press the right mouse button for commands related to the selected item. Also, our handy Navigator is a pull-down tool that allows you to jump to any named range.

### Even More Powerful Business Tools

Lotus 1-2-3 Release 4 delivers more power than ever before. The revolutionary Version Manager gives both individual and workgroup users a way to explore possibilities by saving multiple sets of data to a named range. As you work 1-2-3 automatically stamps versions of data with your name, date, and time. If you work on your own, track the changes to your "what-if" analyses. The Data Query Assistant feature gives you an easy, graphical way to query databases right in 1-2-3! An added bonus is the addition of 250 new macro commands, and 120 new @functions.

### Working Together for You

Enjoy one-click access to cc:Mail, Lotus Notes and many other VIM and MAPI mail systems. 1-2-3 Release 4 gives you full DDE and OLE client/server support, as well as complete Excel compatibility so that you can transition to 1-2-3 with confidence.
