CA-Simply Accounting 2.0B

The Easiest-To-Use Small Business Accounting Software

CA-Simply Accounting has everything you've been looking for to get up and running. Simply Accounting supports both accrual and cash basis accounting methods for your company. It provides password security control data entry and prevents unauthorized viewing. Pre-formatted financial statements and management reports are at your fingertips for quick and effective business management. For Accounts Receivable and Accounts Payable, Simply Accounting uses the open invoice method and allows for full or partial payments. Comprehensive on-line Help and six different charts of accounts help you get into the program fast!

Complete Reporting

Easily export files to word processing and spreadsheet programs for the extra flexibility of custom reporting. You can even link CA-Simply Accounting with word processing and spreadsheet documents that support Windows Dynamic Data Exchange (DDE).

General Ledger

Generates full audit trail with unique journal entry numbers. Lets you apply entries to prior periods within the current year. Imports entries from other programs.

Payroll

Supports both automatic and manual deduction calculations. Retains employee payroll information. Automatically calculates and accumulates most payroll taxes and withholdings.

Inventory Control

Inventory is automatically updated by purchases and sales entries. Maintains current stock levels and values and highlights items to reorder. Handles inventory adjustments and transfers.
