

From Avery Dennison . . .

LabelPro 1.01 for Windows

Great-Looking Labels . . . and More

LabelPro for Windows is the fast and easy way to print Avery labels and other Avery products. You can instantly format Avery labels and other Avery supplies on your laser, inkjet, or dot matrix printer. Create custom designs using scalable fonts, graphics, bar codes and more. And you save time with ready-to-use layouts for over 120 Avery products. Simply choose the Avery product you need, add your text and design elements, and select your mailing list. Step-by-step on-screen instructions guide you through key tasks. Then with on-screen preview you see the results *before* you print.

120 Avery Products Include:

Address labels

Business cards

Diskette labels

File folder labels

Index dividers

Videotape labels

The Tools You Need

Use all your scalable Windows fonts, such as TrueType and Adobe Type Manger -- you can even mix fonts on a single line. With the built-in drawing tools you can add lines, boxes, ovals, and shading. Choose from a library of clip art and borders, plus convenient pre-formatted office messages like *Please Rush*, *Fragile* and *Confidential*.
