Microsoft Excel 5.0

The Most Popular Spreadsheet for Windows

Microsoft Excel version 5.0 sets a new standard for spreadsheets. Built-in intelligence and innovative features let you focus on your analysis, not your data. And rich custom development tools help you build the solutions you want. It all adds up to an intelligent spreadsheet that works the way it should -- the way you want.

An Intuitive Interface Makes Your Work Easier

Enter and edit information by typing it directly into cells with Rich Cell Editing. Move individual or groups of cells easily with dragand -drop data movement. Quickly understand shared worksheets with Auditing tools. With one click, Microsoft Excel visually traces formulas. Identify buttons and toolbars quickly with pop-up ToolTips.

IntelliSense Lets You Do More with Less Effort

Take advantage of a built-in, personal coach -- TipWizard.
TipWizard watches you as you work and gives you tips on how to work faster and smarter. Save time and effort typing in commonly entered data with AutoFill. Make every worksheet look professional instantly with AutoFormat. Use AutoOutline to create reports at any level of detail with a few mouse clicks.

Chart the Way You Want To

Create meaningful charts of your data with ChartWizard -- it walks you through the chart creation process and lets you choose your own options. Update charts instantly with the Drag-and-Plot feature by simply dragging new data to your chart. Change chart size and formatting directly with Hands-On Charting
