## **The NORTON pcANYWHERE for Windows**

### **The Communication Tool -- Made Easy for Everyday Use**

The Norton pcANYWHERE 1.0 for Windows is the remote communications tool -- made easy for everyday use. It provides fast, reliable support for both Windows and DOS applications -- including full-screen DOS applications. The Windows graphical user interface is clear, intuitive and simple. It provides visual representation of key concepts, making it easy to learn and use -- reducing learning time and training costs. The new fully automated install gets the user up and running in minutes. Drag-n-drop technology makes transferring files easy enough for even the least experienced users. pcANYWHERE features a scripting language, a built-in script editor, and a dramatic on-line reference/assist tool, making it easy to automate everyday tasks. In addition, new network features like remote printing support and modem-sharing for network users help maximize resources and improve productivity.

#### **Several Different Features to Access/Control Another PC**

**By Modem; laptop or any PC**

**Across LAN; form a central location reach across the LAN**

**By direct connect; with a cable, join two computers to transfer files**

**Productivity and Performance**

**Norton pcANYWHERE is easy to learn and use -- an all in one communications tool. It includes superior crash recovery, compression and error correction which makes connections**

**fast and reliable. pcANYWHERE also can support 15 terminals and 8 protocols for your general communications needs. You can now communicate with a user on the other end without the need for another phone line with the scrollable chat window. Record screens or entire sessions for use in training to troubleshooting. No matter how you choose to use Norton pcANYWHERE you'll find out how fun and easy it can be!**
