Paradox® 4.5

Relational database power made easy.

Finally, a relational database management system everyone can use!   Paradox for Windows has the features and tools to make you instantly productive without the need for programming.   Speedbars give you push button access features.   You can easily add buttons, check boxes, and scroll bars to your applications. Manage all kinds of information -- from simple text, numbers, and dates to graphics, memos, sound, and multimedia.   All the while you work visually and see the   results immediately!   And you keep your data safe because referential integrity, validity checks, and table and field passwords come built-in.

Start Fast, Stay Ahead

Paradox for Windows comes with built-in productivity assistants that let you get started quickly and stay more productive.   With Form and Report Assistant you can instantly build a layout for all your forms and reports.   Visual Data Modeling lets you create visual data relations by drawing lines between tables.   Then click the mouse to tell the Assistant to change the design until you get just the look you want.

Data Access Like Never Before

Get transparent connectivity to many popular table formats, including Paradox and dBase.   Everything from graphics and multimedia to simple text and numbers can be managed with Paradox and Windows.   You can even include OLE objects from other applications.

Build Window Applications

ObjectPAL: Quickly create complete database solutions.   This high-level, object-oriented database language incorporates simple-to-use, event-driven methods, procedures, and objects.

Minimum System Requirements:
CPU: 80386 or higher
