Microsoft MS-DOS 6.2 Upgrade

Disk Operating System

The MS-DOS 6.2 Upgrade is the easy way to double your hard disk.   It offers features that protect your data and free up more memory for your MS-DOS-based applications.   Once Double-Space -- the integrated disk-compression feature -- is installed, you can get information about your compressed disk in either MS-DOS 6 with the Microsoft Windows operating system means the Upgrade is a must-have for the users of Windows!

Great New-Features Include:

Undelete

Recovers deleted files and directories.   This improved feature, with three levels of delete protection, is available in both MS-DOS and Windows.

Anti-Virus

Protects your data by detecting and removing viruses.   You can use either version: for MS-DOS or for Windows.

MemMaker

Makes it safe and easy for everyone to gain more memory for MS-DOS-based applications.   Just type **memmaker** at the C prompt, and let MS-DOS 6 do the rest.

Backup

The easy way to safeguard your data, and you can use the version that's easiest for you -- either MS-DOS or Windows.
