

From Microsoft . . .

## **Microsoft Windows 3.1**

### **Discover the Point-and-Click Simplicity of Windows!**

The Microsoft Windows operating system makes using PCs easier for everyone. Designed to make learning new applications easy, the graphical interface gives even novice users access to the most powerful features. Windows eliminates the intimidation factor and the learning curve many users experience with the MS-DOS operating system by simplifying many common tasks such as file management and printing. And the Windows On-line Tutorial and Help functions help you get productive faster. Everyone from new users to power users will benefit from using Windows. With thousands of available applications for Windows, there's always a choice of software, no matter what job you need to get done. And there's a wide array of compatible hardware available to choose from -- everything from scanners to PCs -- so Windows helps you make the most of your hardware investments. Four generations' worth of user comments have been incorporated into the Windows design. It's faster. It's easier. It's more reliable!

### **Easy to Install and Use**

Microsoft Windows with Improved Setup gives you a choice of Custom or Express Install, which automatically loads the Windows operating system onto your PC. If you have Windows version 3.0, installing the new version won't change any of your previous settings. Computer-based Tutorials teach you how to use a mouse and quickly trains you on basic concepts. Other new improved features include: Windows drop-down menus, On-line Help, Drag-and-Drop features, and a faster and improved Program Manager which lets you find and start applications quickly.

### **Other Great Features Include:**

Applications for Both MS-DOS and Windows

Object Linking and Embedding (OLE)

TrueType Scalable Fonts

More Efficient Memory Feature

Improved Printing Speed

Support for Laptops

Support for Multimedia Sound

And Much More!

**Minimum System Requirements:**

**CPU:** 80386SX or higher

**RAM:** 640K conventional plus 256K extended memory

**Hard disk space:** 6 MB; 10MB recommended

**Graphics card/monitor:** EGA, VGA, Super VGA, XGA, 8514/A

**Mouse:** Required

**Operating system:** MS-DOS 3.1 or later (MS-DOS 5.0 recommended)

**Other:** Hercules or compatible video graphics adapter and monitor supported by the Windows operating system
