Dinosaur Adventure

The Best Way To Learn About Dinosaurs

Dinosaur Adventure begins teaching your children the computer skills essential for getting through school and the business world, while placing vast stores of information at their fingertips.

Through its "Interactive Book" format, your kids can turn pages forward and backward in their read-along storybook, as well as click on individual words and objects to hear them pronounced. Dinosaur Adventure also includes two matching games, amazing movies and a dinosaur encyclopedia allowing your kids to explore at their own pace -- by time, topic, category, geography and more.

Dinosaur Adventure has proven to be an excellent educational tool for children as young as three. And Dinosaur Adventure was recently selected as Best Elementary Education Program by the Software Publishers Association.

Have Fun! Get Smart!

Learn how and why these amazing creatures appeared. And why after 150 million years, they mysteriously disappeared. Dinosaur Adventure helps you find answers with dramatic illustrations and vivid descriptions as you move from screen to screen.

Experience stunning videos of Pteranodon, Allosaurus and the mighty Tyrannosaurus Rex. Remember, games have a half-life, but knowledge is forever. Let your children have fun and get smart!
