Eclipse FIND 1.01

Instant File Retrieval & Management Software for Windows

Tired of playing hide 'n' seek with your files? Like most busy Windows users, do you find it impossible to remember assigned file names? Eclipse FIND gives you an amazingly fast, new way to locate, access and manage your word processing, spreadsheet, graphics, database, e-mail, fax and all other files in your computer. With Eclipse FIND, you can access all your files in less than 3 seconds!

Save Time

Eclipse FIND's fast, sophisticated search features are surprisingly easy to use. As you work with files in your normal way, Eclipse FIND works in the background. An "electronic index" allows you to instantly find documents based on content rather than file name or location. If you can remember *any* word in the file, Eclipse FIND will find it.

Access Your Files Instantly

You'll be amazed at how much time you save when everything stored on your computer is just seconds away. Convenient tool bars give you instant access to Eclipse Find's most frequently used functions. A Find-by-Contents' icon accesses sophisticated search features, while a Find by Calendar icon displays files in weekly and monthly formats. You can launch selected files from inside the application that created it. Even fax selected documents using Eclipse FAX.

Minimum System Requirements:

CPU: 80386 or higher

RAM: 4 MB

Hard disk space: 3 MB

Graphics card/monitor: Any supported by Windows

Mouse: Optional

Operating system: Windows 3.1
