ClickBook Lite™ 1.02

Instant Booklets from Any Windows Application

Are you looking for an easy way to save paper, time, money and get better-looking documents at the same time? With just two clicks, ClickBook Lite will transform any Windows document into a easily handled booklet. Once you've sampled ClickBook Lite you'll want the whole package with the full ClickBook program. With ClickBook 1.0, Windows documents can be transformed into double-sided address books, school directories, price lists, database listings, technical manuals, event programs, and more. ClickBook takes just seconds to turn a typical 24-page Word document into an easily handled 6-page booklet. Simply select from any of 20 sizes and styles and ClickBook does the rest -- automatically.

The Fast and Easy Way

ClickBook Lite takes the output of your application program's print command -- exactly what would print if you were not using ClickBook -- and shrinks and rearranges the pages to fit a 5 1/2 X 8 1/2 page size.

The Simple Way

Just format pages in any Microsoft Windows application using your program's page preview feature to fine tune, then let ClickBook handle everything else. ClickBook even prints an easy-to-follow guide to help you reinsert paper for double-sided printing on your printer.

Try Your Free Copy of ClickBook Lite for a Taste of the Real Thing -- ClickBook 1.0!
