

Microsoft TrueType Font Pack 2 1.0 **44 New Ways to Look Good on Paper**

It's never been easier to create high quality documents, thanks to Microsoft TrueType Font Pack 2. A perfect addition to the selection of fonts included in version 3.1 of the Microsoft Windows operating system and TrueType Font Pack 1. Use with all your applications for Microsoft Windows. Font Pack 2 is incredibly easy to install and use because TrueType 2 is the only font technology *built into* Windows. The same font is used for both screen display and output, so what you see on the screen matches what you'll get from the printer -- beautiful, professional-quality type that looks great both on-screen and printed.

A Few Highlights

44 scalable TrueType 2 fonts, in any size you want, to add to your Windows operating system version 3.1.

Compatible with all types of printers -- PCL-type or PostScript laser, ink jet, or even dot matrix -- to give you high quality output right out of the box! In most cases, printing with TrueType 2 fonts is even faster than with printer-resident fonts.

Sort all your TrueType 2 fonts into easy-to-use groups with the help of Font Assistant. You can even print samples or a catalog of your type. Also be sure to check the "Headlines" category to see the best headline fonts for your companies newsletter, instead of scrolling through your entire list of fonts.
