

From Davidson & Associates . . .

Davidson's Kid Works 2

The Creativity Kit that Writes, Paints, & Talks!

For Kids of All Ages

Imagine a program that allows children to create and hear their very own illustrated stories. Davidson's Kid Works 2 uniquely combines a word processor, a paint program, and advanced text-to-speech technology all in one! With the ability to convert words to pictures to words, children learn to express their thoughts both visually and in writing.

Story Writer allows kids to create and edit stories using a combination of words, picture icons, and illustrations.

Story Illustrator's lively sound effects and exciting paint tools, picture stamps, and background scenes make painting a blast!

Kids hear their own stories read aloud as the **Story Player** shows off their latest story and full-size illustrations.

Awards Include . . .
