## Star Trek®: The Screen Saver 1.0

### Let your monitor "Live long and prosper."

New from the makers of After Dark®, Star Trek®: The Screen Saver. Save your monitor from phosphor burn-in with over 15 fantastic displays based on the original Star Trek series.

Watch your screen come to life with the crew of the U.S.S. Enterprise™, those troublesome Tribbles, and Dr. McCoy's Sickbay monitor. Join Captain Kirk on the bridge as you warp through the galaxy. Relive the drama as the Tholians weave their energy web around the U.S.S. Enterprise. Look into Scotty's technical files containing the blueprints for the U.S.S. Enterprise, Klingon battle cruisers, and other 23rd Century hardware. Browse through the Planetary Atlas showing dozens of strange new worlds. You can even leave "subspace" messages for your co-workers with the Communications display.

This incredible new collection of colorful animated displays is enhanced with digitized sound effects from the original soundtracks. Hear the gentle cooing of the Tribbles, Mr. Spock's famous quotes, phaser blasts, bridge sounds, your favorite Star Trek themes, and more!

This stand alone screen saver does not require After Dark software to run, but it will run all After Dark displays. Also includes screen-locking password protection, and SystemIQ™ Activity Monitor to sense computer activity and maximize system performance.

#### Minimum System Requirements:

**CPU:** 80286 or higher

**RAM:** 2 MB

**Hard disk space:** 3 MB

**Graphics card/monitor:** VGA or higher

**Mouse:** n/a

**Operating system:** Windows 3.0 or higher

**Other:** n/a
