Introduction

Hyper Maker HTML 1.3 is an HTML editor that permits to create multimedia publications. It include an setup/visor program for the free distribution (without royalties) of HTML multimedia publications, in diskettes or CD-ROM.
Hyper Maker HTML supports most of the HTML 2.0 tags and several of the most useful HTML 3 enhancements:

>Inline images (bitmap, GIF, and JPEG)
>HTML Tables
>HTML Forms
>Default font sizes, styles, and colors
>Background images
>Inline Video
>Background sounds or "soundtracks"
>Inline Audio
>Pop-up Windows
>Encrypted HTML files
>Multipage publications

This package include two programs:

Hyper Maker HTML 1.3	Editor and publication compiler of HTML files.
HMViewer 1.3	Read-only viewer & installer for distribute the publications.

How to Make multipage publications

A Hyper Maker publication consists on:

An ASCII file, with the PUB extension, which contains the publications files list of HTML pages, and its visualization options.
One or several HTML files, that forms the pages or articles of the publication.
Any number of images, videos and sounds.
The viewer program: HMViewer.EXE.

To create a publication is accurate that all the files who composes it should be found within the same directory.

The *Publication/New* command is intended for arrange the HTML pages of your publications. This command open the *Publication Window*.
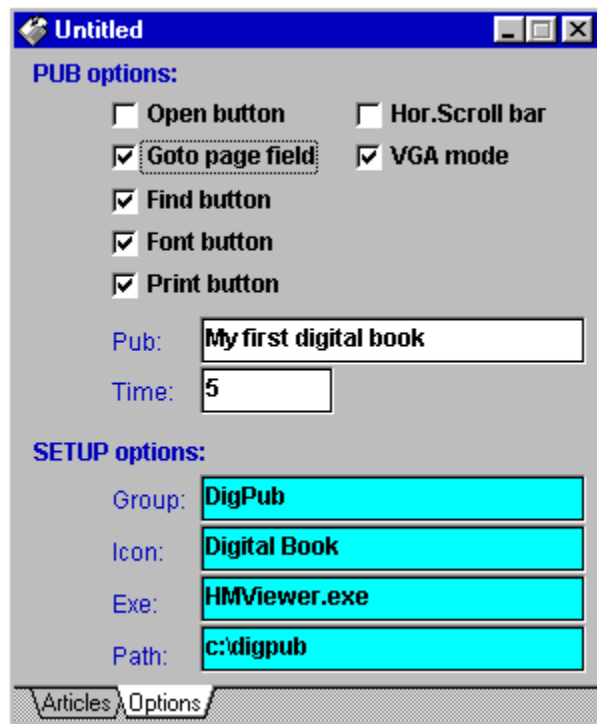

Publication Window

This Windows is separated in two pages:

Articles
The top toolbar of this page includes buttons for several uses. Make click on the buttons for a brief description of its functions.
The order in which articles (or *pages*) appear in the list box of this page, determines the order in which the HMViewer shows and browse them.

Options

This page allows the customization of the HMViewer program button bar.

The check boxes present options for the user; the user can check it to select the option, or uncheck it to deselect the option. Make click on the buttons for a brief description of its functions.

See How to Distribute Publications, for more instructions.

How to Distribute Publications

The *Publication/Copy files* command*,* encrypts and copy all the publication files, and the <u>Setup program</u> in a temporary directory.
The ***<u>Options</u>*** page, of *Window Publication* , let you specify the options for install your publication.
After copy the files into a temporary directory, you got to copy them at diskette or CD-ROM.

        BORDERCOLOR
        BORDERCOLORLIGHT
        BORDERCOLORDARK

HTML Forms

Full supported.

Multimedia options

VIDEO

                <A HREF="left, top, width, height, MyMovie.AVI">Ply MyMovie>

The AVI file will be scaled to the specified width and height, and then positioned
according left and top values.

SOUNDS
The BGSOUND tag allows you to create pages with background sounds or "soundtracks." Sounds can either be WAV (WAV format) or MIDI (MID format). The HTML tag used to insert a background sound into a page is:

< BGSOUND SRC="start.wav" >

Another option:

< BGSOUND SRC="start.wav" LOOP=INFINITE >

This tag must be placed within the first 20 lines of the HTML file.
Another option for playing sounds is:<P>

<A HREF="start.wav">Play start</A >

<A HREF="op23.mid">Play op23</A >

The LOOP attribute is not applied here.

<A HREF="left, top, width, height, MyMovie.AVI">Ply MyMovie>

The AVI file will be scaled to the specified width and height, and positioned according left and top values.

About Viewer Module

Applications

The HMViewer enables you to distribute your HTLM files as multipage publications.
It can be used to distribute:
- Catalogues
- Books
- Presentations
- Educational material
- Magazines and digital newspapers
- And everything you need

The HMViewer can start executable programs and Windows HELP files, thus making it suitable for tutorials or shareware programs distribution.
This freeware edition of HMViewer has some limitations, but they cannot be found in the professional version:
- It is limited to a maximum of 5 pages.
- It only accepts BMP images (GIF and JPEG available en Pro version).
- It cannot show videos (AVI), nor play sounds.
- It dont support Forms.

HMViewer interface

The HMViewer interface is quite simple - the buttons at the bottom of the screen allow you to control the basic operations. (see the viewers help for information).

The HMViewer also possesses a pop up menu, that enables you to create new windows, or to accommodate the existing windows, within the screen. These functions are useful when its required a simultaneous several pages view.
The backspace key is also very useful - it allows you to return at the previous page viewed.
The corresponding keys of each button is indicated in the status bar when the cursor moves over any button.

Registering the Shareware Version

You can register or request information about Hyper Maker HTML by E-mail to
bersoft@satlink.com.

Registration Benefits:

The registration code will update the visor module (used to distribute the publications).
The viewer shareware version has some limitations, which cannot be found in the registered
   version:
- It is limited to a maximum of 5 pages per publication.
- Only accepts BMP images.
- Not allow hypertext links with pages outside the browse sequence.
- Cannot show videos (AVI), nor play sounds.
- Not support Forms.

Hyper Maker HTML (the editor module) is not limited in any way.

You can choose different options to be registered

Option	Benefits
Basic registration ($ 40):	GIFs images.
	Unlimited number of pages.
	Hypertext links to any file.
	Customizable button bar, help and logo
	Customizable help file.
Optional adds ($ 20 each one)	**1.** JPEG images.
	2. Forms.
	3. Set Font Specs.
	4. AVI videos.
	5. WAV and MID sounds.
	6. Incorporated setup program.

The registration price for the full version is $ 150 (40+(20*6))-$ 10 discount.
Also you can specify those specific items wanted to incorporate in the registered version..
Example:

AVI videos	$ 20
JPEG images	$ 20
Basic registration	$ 40
TOTAL	**$ 80**

*If at first you request the standard version, and later add any of the options, you will be
surcharged $ 5 to cover the fixed operation expenses.*

**The registered user can distribute freely with their publications the Hyper Maker Visor
Module, without paying any royalties.**

Registration Procedure:

When your order is received, I will send you a telephone number and an address, so you could

order Hyper Maker through your credit card (MasterCard, Visa, American Express, or Discover), by phone or mail.

The credit card order service will notify me your order, and I will send you the registration code to legally enable the full operation of Hyper Maker.

The registration code that I   will send you will be valid only for the name and company that you specify in your order.

To update the freeware version to the registered version of **HMViewer**, click in the *Registering form* command in the *Help* menu.

The registration window will be open:

Write your name, the name of your company (or any second name) and the registration code. This operation will update HMViewer.
