

# Microsoft Windows NT Version 3.1 Hardware Compatibility List

The following computers and peripherals have passed Microsoft® Windows NT™ operating system version 3.1 compatibility testing as of May, 1994. Some computers may be sold with additional peripherals that are not yet supported by the Windows NT operating system. If your computer or device is not listed below, contact the manufacturer for more information. We have not tested every computer and/or device in all possible configurations. Please refer to the file SETUP.TXT on the install media for additional compatibility information when installing Windows NT.

Items listed with footnote number <sup>1</sup> require one of the device drivers available in the \DRVLIB directory on the Windows NT CD-ROM. These drivers are also available in the Windows NT Driver Library.

Items listed with footnote number <sup>2</sup> are supported with device drivers available in the Windows NT Driver Library. Please see the section at the end of this document on accessing this library.

Updates to this list will appear in Library 1 of the WINNT forum (GO WINNT) or Library 17 of the MSWin32 forum (GO MSWIN32) on CompuServe® Information Services.
