EMPEROR OF THE FADING SUNS
SegaSoft, Inc. / Holistic Design, Inc.
Internet Demo (Tiny v1.0)

INTRODUCTION:

In Emperor of the Fading Suns players control one of the Five Noble Houses, each trying to command enough votes to be crowned Emperor of the Known Worlds. Players must deal with complex politics as different factions try to force their own agenda and gain favor with the more powerful noble houses. War, treachery, and trade all combine to make EFS a grand strategy game, with its immersive background and science fiction setting giving you a unique feel and point of view.

Enter the world of the Fading Suns... and become enmeshed in a bold, Gothic world where advanced technology has plunged the galaxy into a new Dark Age. Explore, expand, exploit and exterminate in your ruthless quest to unite the planets and attain the crown of Emperor. Nothing less than the future of the Known Worlds hangs in the balance!

- Explore new planets, research forbidden technologies and control the growth of an Empire!

- Wage war with four opponents, battling for territory and forging strategic alliances crucial to securing the crown!

- Colonial outposts come to vivid life through fully-realized environments teeming with trade and treachery!

- Continually evolving story line provides multiple ways to win -- and a game that never plays the same way twice!

SYSTEM REQUIREMENTS:

Here is a list of the minimum system requirements for this demonstration version of Emperor of the Fading Suns:

Operating System:	Microsoft Windows '95 with Direct-X 3.0
CPU Type/Speed:	486/66 DX2
Memory:	16 Megabytes
Video Card:	Direct-X Compatible SVGA card
Hard Drive Space:	25 megs of Free hard drive space
