

## Miscellaneous

Particle Phantasy can be a complex program to use and getting the result you are after can sometimes be difficult, especially as you use more of the different features and settings. Experimenting and seeing how each setting and feature will change the output, just as in your 3D rendering program, is one of the most helpful things you can do for yourself in the long term.

Please see the enclosed order form for information on registering this copy in order to receive support.

We're interested in anything you might have to say about our products, or anything related to them, so feel free to drop us a line.

Our current website (as of December 1996) is at:

<http://members.aol.com/zytopia/index.htm>

This will change once we get our own server up sometime in 1997, but there should always be a link to our site at the above location (barring something happening to/with that provider).

Current email addresses:

[Zytopia@aol.com](mailto:Zytopia@aol.com) - for general comments, questions, thoughts, complaints, etc.

[ZySales@aol.com](mailto:ZySales@aol.com) - for sales related questions or problems.

[ZySupport@aol.com](mailto:ZySupport@aol.com) - for technical help (registered users only)

Thank you for trying this program!
