## ABOUT THE EDITION

The **WinOnLine™ Review™ Shareware Edition** is published weekly except for the last week of the month by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Week after week** we bring you the *newest shareware, freeware* programs and *features*, such as:

---

**Windows Shareware Briefs** - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

---

**New Files** - Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

---

**Feature Reviews** - Hear about hands-on experiences with the inner workings of the some of the **newest shareware**, with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

## The WinOnLine™ Review™ Shareware Edition *is published courtesy of the* **Windows OnLine™**

## WRITERS WANTED

Wolly would like to include at least two reviews in each issue of WOLRS, but he can't without *your help*. Do you like to pass on your impressions of a program to your friends? Do you have your favorites? Tell the world *why*! Leave Wolly a message on WOL and *we'll talk!*

## INDEX

Wolly heard from a couple readers that the **index to past issues** is helpful (the last item in the table of contents). We'll try and keep it current so you can refer to it when you're looking for info on a program or seeking out a particular type of shareware.

We're always happy to help our readers. Any suggestions, just leave a note!

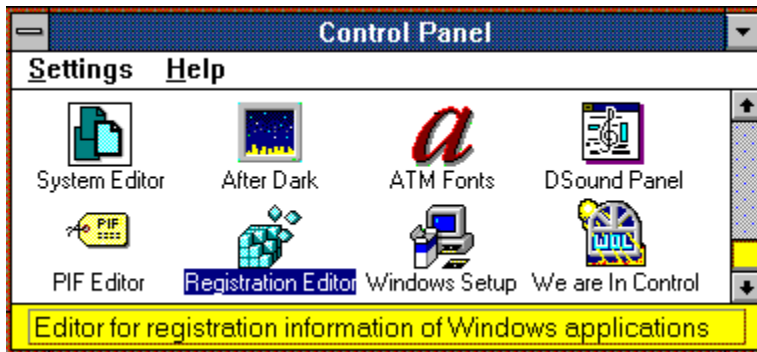

**Enjoy the issue !**

## CONTROL PANEL APPLETS

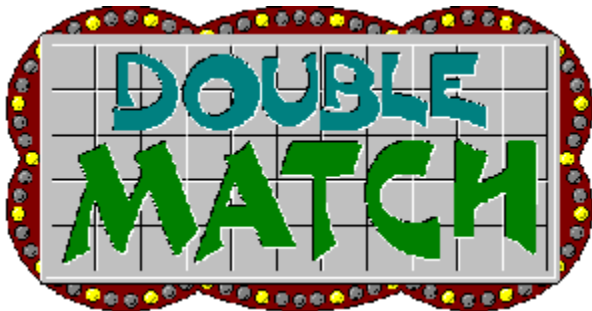

Does an applet a day keep the repairman away?

Add up to **seven new options to your Windows Control Panel** with these CPL files from NEVERnever Software. Simply copy the applet files (about 1900 bytes each) of your choosing to your Windows System subdirectory and have them magically appear for your use. Enjoy the convenience of this **freeware** program by retrieving the tiny **NN\_CPL11.ZIP** (9K).

## DOUBLE MATCH

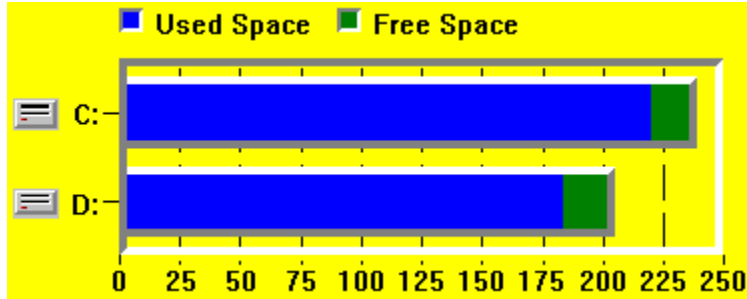

Can you concentrate?

The author of Triple Yahoo (Yahtzee) is back with Double Match (Concentration). It's a **nice rendition of the game**, with icons used as the images requiring matching. **No rebus** to solve beneath the squares as you match them, but a common phrase which may be guessed as you uncover enough to make sense of it. **Additional phrases can be added to the database**, and the WAV sound effect files can also be replaced if you like. **DBM10.ZIP** (108K) can be registered for **\$14.00**, or \$12.00 via CIS. If you download this game you'll find that *one of Wolly's cousins is a happy participant*.

## FREE DISK SPACE

Freeware program

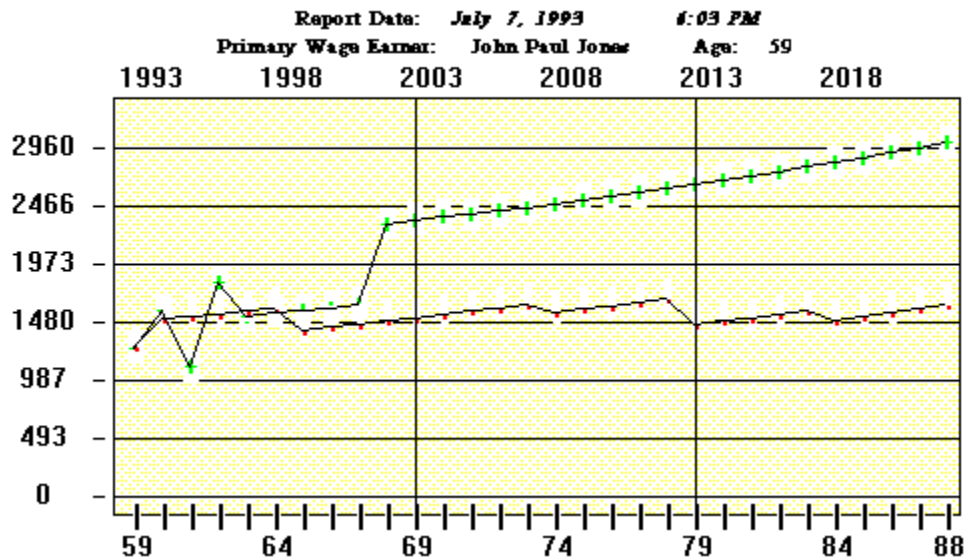

Very nice, and configurable to include the drives you wish and even sound a warning when you broach a percentage of free space. View a **graphical representation** (as shown) or a **text display**. WFDS101.ZIP (99K) is worth a look if you like to live on the edge and know when you're about to slip off.

## RETIRE A

My broker sez, "Buy lottery tickets."

### Thirty Year Retirement Analysis - Report 1

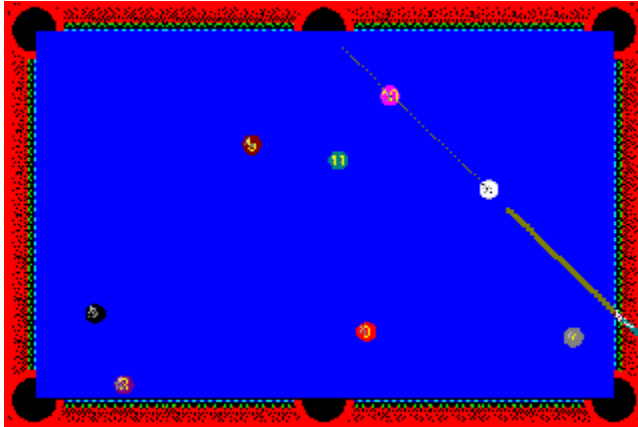

Retirement thoughts are beginning to loom heavy over the baby boomers in the crowd, as well as many who see the employment as a place where you never stay long enough to get vested. **No time like the present to plan for the future.** RetireA doesn't appear very inviting on the surface, but there is **much to work with**. Enter data regarding your finances, and RetireA will provide you with output to **project your future monthly income and expenses**. There are modules provided to **calculate loans, annuities, compound interest, and even mortality rate** to see if it all matters (Bob visibly paled when he found out that the chances were 1 in 4 that he wouldn't make retirement age). You will need to spend some time learning the program and getting your numbers together, but RetireA may give you some incentive to up that 401K percentage today so you can better enjoy tomorrow. A modest registration fee of **\$14.95** will

bring you both a manual and the latest version. **RETIREA.ZIP** is worth a look.

## WIN POOL

Whew! Can I jump in it to cool off?

Those who are Billiards-impaired can **practice pool hustling fantasies at the PC now**. Visit *Saloon Hidir in faraway Turkey* and **play pool to your heart's content**. Those of us who may have picked up a cue back in their college days (strictly legit, of course) may quarrel with geometric accuracy and want for a bit of English to influence those rolling spheres, but it is **good fun**. Games can be saved and restored, though scorekeeping is a manual effort. A math co-processor will help keep the action moving. Chalk up your mouse and download **WINPOOL3.ZIP** (70K). Your registration of **\$15.00** can be mailed to a US. address and will bring a postcard from Turkey in acknowledgment.

## PAI GOW POKER

Deal me in!

Wolly didn't totally understand Pai Gow Poker, but it is not the program's fault. The help file explains the game and its strategy as well as the program's operation. It is a **Chinese tile game which has become a card game** popular in gambling establishments. **Graphics are good** and options for amateur and pro are available. Registration options range from **\$10** to \$20 for **PAIGOW20.ZIP** (85K). Practice up before your next Vegas jaunt.

## ALL INI

Is yours an INI or an OUTI?

This **INI file maintenance program** does the job in its own way. Any INI file can be selected, whereupon the section headings of the file appear in file or alphabetical order for your selection. You can only select a line at a time to delete or edit. No automatic backup is provided. But you can register [ALLINI21.ZIP](#) (18K) for only **\$2.00**, which includes registration for the next update.

## TRUE TYPE FONTS

Another fine selection

**Felt Tip** [FELTTIP.ZIP](#) (26K)

**Holy Moly** [HOLYMOLY.ZIP](#) (77K)

### **Sans Black Condensed**

**Sans Extended Sans Serif** [TT\\_SANSF.ZIP](#) (192K)

contains eight TTF files with variations of Sans Serif type

**URW Antique** [TT\\_ANTIQ.ZIP](#) (151K)

also includes the same style in a heavier rendition

## TOOLBAR

A worthy replacement

Toolbar can be a **program manager (shell) replacement** or adjunct. The author makes the valid point that program manager *organizes* programs rather than provides more useful purposes. For instance, you cannot drag and drop a file from the file manager to an icon in a program group. Toolbar allows you to do so. It acts very much like program manager but brings this and other useful twists its the basic functions. Keywords are included to **customize the title bar** to incorporate time, resources, etc. [TLBAR101.ZIP](#) (65K) is a high quality, clever and thoroughly documented program, and is **freeware** thanks to **author Juan M. Aguirregabiria** of Spain.

## TURBO THOUGHT

Help! I'm stuck in neutral!

Decision making and problem solving can be arduous processes when many factors are involved. The human mind can juggle just so many pieces of a puzzle before they begin to blend into unrecognizable masses and start to drip out of your ear onto the floor. Turbo Thought **brings an old and valid method to the computer screen.** Placing thoughts into concrete phrases on cards, and then categorizing and sorting them is a time-testing method of getting your arms around all the facets of a problem. This program **gives you facilities to record all of your factors, categorize them, group them,** etc. It will even automatically shuffle them for you.

**TTHOUGHT.ZIP** offers a **fascinating method for mental gyrations and provides useful tools to further your analysis** of all the components of your problem. It doesn't provide the answer --- it just helps you to recognize all the possibilities. Registration is **\$20.00**.

## JURASSIC CAD

Could *it* become extinct?

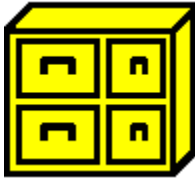

Stuffed animals, games, puzzles, lunch boxes, and why not a Windows drawing program to ride the rising tide of Jurassic Park? This program is pretty in appearance, but **erratic and not up to par.** **JURASCAD.ZIP** (502K) can be registered for **\$20.00** if you are more impressed with it than Wolly was.

## WizManager 1.1

File Manager is one of the most powerful, yet more maligned, elements of the Windows operating system. Though File Manager offers a wide range of features suitable for both the beginning and the advanced user, it does take a while to master the attributes of this program. Often simply finding the command you want is quite an adventure. A simple action such as vertically tiling the windows, for example, can be quite a thrill until you figure out how File Manager wants you to perform this task. If you open File Manager with a single directory shown, you can add an additional directory with the Window - New Window command. This process puts the second directory on top of the existing directory. To tile these windows, you then click on the Window - Tile command. This neatly tiles your windows horizontally, with one on top of the other. It took me about two weeks to find that holding down the SHIFT key while clicking on Tile command will tile the windows vertically, with the windows side-by-side.

I've often wondered if the creators of File Manager went to the QWERTY Keyboard school of design. (For those who don't know, the QWERTY keyboard was designed to slow down fast typists so they could not jam the key on the early manual typewriters.) Well, fortunately, it seems that I am not the only one who has found fault with the condition of File Manager. The folks at Mijenix also found this flaw, as well as several others, and have taken steps to correct Microsoft's oversight. The program I refer to here is [WizManager 1.1](#).

When installed, [WizManager](#) adds a few items to the standard File Manager. The most obvious difference you'll see is the addition of a series of icons across the screen, directly below the menu bar. This is the **Fast Access Buttonbar**. These icons, or buttons relate to the windows commands found in the menus in File Manager. So, rather than searching the menu bar, as I often do, the commands are immediately available in a series of buttons. The box at the left of the buttonbar is the **Command Line Box**. This box gives you quick access to the

DOS command line, so no more shelling out to DOS for a simple command such as DELETE or COPY. Those users who are new to computers or only familiar with the Windows environment may not fully appreciate this aspect of the program. However, users accustomed to the DOS command line will appreciate this addition to File Manager. Here *WizManager* gives you the best of both the Windows and DOS worlds.

The *Fast Access Buttonbar*, as installed gives you 46 different command buttons. (50 if you are running Windows for WorkGroups.) Though the arrangement of these buttons is quite logical, I found the *Customize Buttonbar* option quite useful. This option allows you to position the various buttons in any order you desire. So, even though all the buttons are shown, the buttons you use most often can easily be positioned at the left side for quick access. The left and right pointing arrows at the left side of this bar allow you to scroll through the complete set of buttons. The specific numbers of buttons that appear on the screen at any one time depend on the resolution of your screen.

The program also adds a *WizManager* option on your File Manager menu bar. This menu is used as an easy access to the *WizManager* options as well as a useful control of many of the other system functions. The *Launch* option, for example may be completely customized for the programs you use most often. So, when needed, they're only a mouse click away. In addition, the program offers a variety of other useful features such as printing your directory or tree as well as a *Printer Setup* option that Microsoft forgot. The preferences option allows you to pre-set many system options and even allows you to add a password to limit access to your data.

The *WizManager* program is very well documented and the User's Guide furnished with the program is well done. The manual not only explains each command thoroughly, but also steps you through all areas of the program. Even the Online help system is very well done. With the *WizManager* program on your system I think you'll find File Manager a whole lot

easier to use and much less intimidating. In fact, this is definitely a program that's found a home on my system. Members of Windows OnLine can find *WizManager* as WIZMGR11.ZIP in Directory #150 - (Windows-New Uploads).

*This listing is as of June 1993 and is presented as an example of the tremendous number of WOL directories and files available to members. Remember, these are clean file listings, purged of useless duplicates or obsolete files. Windows OnLine™ works hard to gather the best and latest for its members!*

**Windows OnLine™ brings**  
**THE BEST AND LATEST FILES**

**NO JUNK** - we obtain the files ourselves, screen them thoroughly and edit their descriptions

**THE LATEST FILES and MORE FILES** - we get them EVERY DAY!

**MINIMAL DUPES** - we clear off the old when we bring on the new

**EVIDENCE:** Scan the **NEW FILES LISTINGS** in this issue. This is just our Windows and OS/2 files. Twice as many DOS files come in each week in addition to the quality and quantity you see here.
