The **WinOnLine™ Review™ Shareware Edition** is published weekly by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the ***immediacy*** of this electronic media. **Each and every week** we bring you the ***newest shareware and freeware*** programs, and features, such as:

Windows Shareware Briefs - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

New Files - Tasty extracts from the past week of files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for!

Feature Reviews - Hear about hands-on experiences with the inner workings of the some of the **newest shareware,** with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

The WinOnLine™ Review™ Shareware Edition
is shareware itself

This useful and fascinating electronic magazine deserves your readership and shareware subscription**.** We hope you find this weekly publication of great value and interest and become a regular reader. Welcome to the
WinOnLine™ Review™
SHAREWARE EDITION

WOW! What a great response to our first issue! Even the critics gave us notice:

"A quick and satisfying download, even at 2400 bps, with amazing content at only 160K!"

American Times

"We especially enjoyed Wolly's comments on DOC file extensions on text files in Windows shareware zips."

The Whine Spectator

"Wolly was seen staggering around at Spago's with Rosanne Arnold last Friday night, sloppily celebrating the first WOLRS issue. Husband Tom Arnold made quite a scene when he caught them showing each other their tattoos . . ."

International Inquirer

Anyway, we were glad to hear your kind comments. If you have some suggestions, criticisms, or just want to vent your own spleen, leave me a message on **Windows OnLine™ (BBS)** at 1-510-736-8343 or drop Wolly a line c/o WOL, Box 1614, Danville, CA 94526-1614. We'll publish some of the more interesting, funny and sarcastic letters and posts here.

FILES, FILES, FILES . . .

Whew! After **slaving over the next hot issue of WinOnLine™ Review™ Shareware Edition all week**, the boss has taken my involuntary servitude to new highs (and lows)! He's had me **moving files day and night**, and the exertion aggravated an ***old football injury*.** (Once, when I was watching a game in '82, I tripped getting out of the recliner while reaching for another beer).

We've moved the New Windows Files #78 to #148, New DOS Files #80 to #150, and separated countless files into new categories. Instead of the former 80 directories, there are now 150 directories, sorted into convenient categories for your browsing and locating pleasure. ***That's over THREE GIGS!*** (See **Files** under the **About Windows OnLine™** section for the new directories.) Oh! My Achy Breaky Back!

US Robotics 14.4 V.32bis MODEM = $184.95

You say it ***can't be!?!*** Gotta be a **typo**? **SPECIAL prices direct from WOL** brings the **quality** of U.S. Robotics modems at ***amazing*** prices that leaves the brand x stuff in the dust. ***See the special section*** for details on the selection of USR modems and fax-modems in this issue of WOLRS.

THIS WEEK IN WOLRS

Hope you enjoy Issue #2 of the **WinOnLine™ Review™ Shareware Edition**. It was **a great week for new files**, so you'll see **LOTS of Shareware Briefs** this week with a couple turkeys mixed in with the eagles. Five **new True Type fonts** to challenge your printer, and bunches of new files and some updates to popular programs. The Shareware Fairy was kind this week, so you'll see quite a bit of **good stuff in our Windows, OS/2 and DOS New Files areas**.

Writer **Ed Hoffman** sez, ***"Wolly --- Kwitcherbitchin!"*** and brings a great **Shareware Review** of ***Detour***, a program to solve those file association complaints. This one looks like a real winner and definitely a goodie to add to the collection. Never fear, Wolly will find something else to gripe about.

Be sure and look over our **Top Ten Reasons**! **Register your readership** - it'll make both you and Wolly smile! See ya' on WOL!

Enjoy!

DRAG AND VIEW

Dan Baumbach drags in another winner!

Drag and Zip is my favorite zip utility, and now it looks like author Dan Baumbach is going to get more of the Wolly shareware slush fund for Drag and View. While there are other drag to view programs, this one **recognizes the file format** and chooses a **suitable display**. It recognizes and **shows these popular formats**: ASCII, Hex, Microsoft Word, Microsoft Word for Windows, Windows Write, Word Perfect, Word Perfect for Windows, Ami Pro, dBase, FoxPro, Clipper, Paradox, Excel, Lotus 123, Symphony, Quattro, Quattro Pro, BMP, ICO, PCX, GIF, TIF, ZIP and LZH. Of course, don't expect fancy formatting, just content. But **DV.ZIP** (276K) made me content and is $25.00 including shipping of a disk with the latest version.

GRAVITY DESK

A very heavy program, indeed.

Gravity Desk is quite an accomplishment, seemingly a **commercial grade application** in the shareware world. Summarizing the program is something the author even avoided, as it is a bit involved. Suffice it to say, one of its primary features is to allow **40 character descriptions for your cryptic DOS file names**, referred to in the program as "aliases". But that's only one facet of this jewel.

Alias group names can also be created to organize files, again using 40 character descriptions. Other features include **excellent file management and manipulation**, including movement, copying and deletions by extensions. Associations can be easily established by file types for quick launching of programs. Drop down lists of programs and files make access and execution a dream.

This is a program you're going to need to sit with for a while to really learn all the ins and outs. Author Jack Killpatrick provides a WRI file 29 page manual and context sensitive help which should aid your quest. The best news is that **GDESK10.ZIP** (230K) is only **$25.00**, which includes the return of your registered version of the program with additional features not included in the shareware version.

Gravity Desk was a very close second for ***Wolly's Winner of the Week***

BOG for Windows

I think I'm bogged down enough!

Here's another board game transplanted to the screen to **exercise your vocabulary** skills. **Boggle** is the basis for this game, where you make words from series of adjacent blocks on a randomly generated matrix of letters. Then the computer finds three times as many words and you never play it again.

You can register **BOGGLE.ZIP** (32K) for **$10.00**. If you like this type of word matrix program, check out **WORDSTLK.ZIP** (68K) reviewed in WOLR Issue #69. It's $15.00 and deserves a look before committing to Bog.

NICON

Bogus!

Nicon purports to be an *icon editing tool for MS Windows*. Perhaps it is, but it is a **DOS program** masquerading as a Windows program. 86 it! Wolly don't do DOS.

FONT NAME

Oh mystery file, what font art thou?

Those **cryptic DOS font file names** are a real pain. The font you want never bears any resemblance to the file name (Murphy's Law 4.1 §2.35 sect. 26c). **OsoSoft** comes to the rescue with Font Name, a **freeware** package that looks into the bowels of FOT (True Type) or PFM (Type 1 Postscript) files and reveals the secret woid. (However, no duck drops down).

Just highlight the file name and the font name appears. If you'd like some documentation, Font Name will **print you a list**. And delete the unworthy. Very handy and free. **FNTNAME.ZIP** (19K) is from the OsoSoft folks who've brought you Fonter, MultiLabel, Rockford!, and other programs you've seen us review in the past. (Hey, it's a freebie, gotta give

'em a plug!)

NEW FONTS

FIVE new ones for your collection

Speaking of fonts, here's five that showed up on WOL this week. If you like their looks, grab 'em. All samples were entered in upper and lower case. If you don't see lower case, that means there is none.

BAZOOKA **BAZOOKA.ZIP** (33K)

Calligrapher **CALLIGRA.ZIP** (31K)

Chaucer **CHAUCER.ZIP** (41K)

FILLMORE **FILLMORE.ZIP** (28K)

Jester **JESTER.ZIP** (44K)

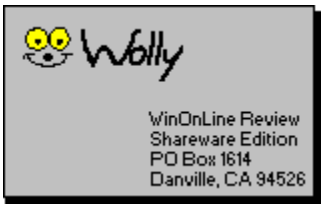
PRINT TREE

Grind your branches into paper

Select a drive, select a font, **print your directory tree**. Simple, straightforward, and **$10.00**. That's all **PRNTRE30.ZIP** (26K) does. Hmmm.

ROCKFORD

Instant Business Cards



Remember the Rockford TV series? Slick ol' Jim would crawl into the back seat of his car and use a little device to print a fresh phony business card. Then he'd con folks out of info so he could solve his cases. If OsoSoft's Rockford had been available, Jim would've used a laptop and

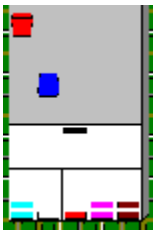
portable inkjet to make even slicker cards. And maybe the ink would've dried faster and he wouldn't have gotten caught so often.

The latest version 3.0 of Rockford has some **improvements and new features**. Creating a business card is quick and easy, and editing, while not DTP or even word processor versatile, is not all that difficult. You can use your True Type or ATM fonts, import, size and position BMP or PCX graphics, and produce some very nice output. There's even a drawing tool and the ability to do white on black (reverse). Options include a layout ready-to-cut and con, or **camera ready** to hand your printer. A well-written WRI file is included to help you learn Rockford and give you composition tips.

Registration for Rockford is **$20.00** for the shareware version, which includes return shipment of a disk with the newest version along with documentation. A professional version, which includes options for business names on proofs and a clipart library, is available for $30.00. Grab **RCKFRD30.ZIP** and create your own business cards. Conning people is optional.

TILES AND TRIBULATIONS

All my tiles, Lord, soon be over . . .



If you liked **Tetris**, you'll probably like Tiles and Tribulations (you've got to at least like the title). It's **not at all a clone, but has a similar theme**. **Catch the tumbling tiles** and drop them into a bin with similarly colored tiles to make them disappear, making room for more. It's a simple concept, but execution is not easy. It could be as **addictive** as Tetris once was.

The registered version of **TILES.ZIP** (191K) is **$21.95**, but includes fifty challenging levels, secret codes for **level warping, digitized sound effects**, and a customizable **MIDI stereo** soundtrack. TCI also offers a special deal including their Stellar Explorer 2.0 space attack game for Windows at $34.95. The demo version of Tiles and Tribulations should give you enough of a taste to see if you'd like the full version.

INVOICE-IT for Windows

Send a bill & forget the bookkeeping --- drive your accountant nuts!

This handy Windows program **prints a very nice looking invoice** to help you get paid for whatever it is that you do. Most invoicing programs come attached to those cumbersome old accounting programs, with debits and credits and accruals and all that messy stuff. Not Invoice-It! Just send a bill. I'll worry about the green spreadsheet stuff at tax time (or not).

Invoice does keep some **handy databases of customers, products and invoice histories** that conveniently drop down and can be popped into the appropriate location on the invoice. You can even get **sales journals** and **post your payments** to keep track of open invoices. **INVIT200.ZIP** (79K) may serve your needs if you got your degree from the Minimalist School of Accounting, but be detail oriented enough to send the author **$35.00** for its use. **WARNING:** The program does not come with a **Get Out of Jail Free** card.

Wolly's Winner of the Week!

WIN CLIP

Hey, is this column an OsoSoft commercial or what?

The only thing that can get out of hand quicker than font files is graphics collections. BMP and PCX seem to be the formats of choice with Windows. **WinClip allows you to view your BMP and PCX files** on screen, then print a catalog of all those graphics files or just the ones you select. This could be very handy when you're looking for just the right graphic to complete that DTP project.

The interface is intelligently done, with a large window at right for display of the files listed on the left. Using the control buttons in the middle you can easily view images, **print a single image**, with the filename, or **print image catalogs**. Images can be zoomed from 10% to 500% on screen or to the printer. A quick click **calls up an edit program** (Paintbrush, for example) to alter the file.

One of the features I especially liked was the ability to view, and then copy, move and delete images right then and there. This is a boon to those of us with tons of graphics that need to be weeded of the junk, or organized into categories. WinClip supports 1, 4, 8, and 24-bit images on all displays.

Registration is just **$20.00**, which includes a fresh disk, printed manual and support. **WCLIP30.ZIP** (96K) is *another* **OsoSoft** program. Apparently these folks don't get out much in the winter.

ATOMS

Winons, Atoms and their trails

Atoms is a variation of an old HP calculator game. A matrix is presented on which invisible atoms reside (of course they do; have you ever seen an atom?). You fire Winons to help discern their locations based on the exit pattern. You better read the docs carefully if you expect to understand and successfully play this one if you've not seen it before. **ATOMS21.ZIP** (51K) is a mind game for which author Mike McNamee requests a contribution of about $5.00.

CRETE CALC

This program really gets hard!

While this shareware program dates to 1991, it's worth digging up with the summer season coming. Many of you will be thinking about pouring a patio, foundation pilings, or sinking a competitor into the nearest deep body of water. Crete Calc determines the **amount of concrete you need for your project**.

Calculate your requirements based on **rectangles, cylinders and triangles**, specifying sizes and depths, and determine the **cubic yards necessary**. Crete Calc will keep a running total if you need multiple odd shapes and sizes. **CRETE.ZIP** asks for $5.00 for its convenient calculations. I'd pay ten if it had some advice on keeping the neighborhood kids' fingers out of the fresh stuff.

Wolly's Shareware Comments:

Have you seen some of the *junk* on the shelves of your local software store? Scrounging around the store brought disgusted gales of sad laughter at the prices of some of the offerings that **pale in comparison to much of the shareware** we see here each week.

Do yourself and your friends a favor! **Keep up on the shareware scene.** There aren't too many problems that don't have shareware solutions. **Browse our new file listings** each week --- *that's why we reproduce them here for you*. Download a text file listing of directories from a good BBS (like WOL) and **use a text search tool** to find strings of characters that could tip you off the file you're looking for. You and your buddies will appreciate it.

Wolly's not putting down all commercial stuff. Just the bottom-feeders who put out mediocre and outdated programs in pretty boxes for $35 when a better program is available in shareware direct from the author for less. *And you get to try it first!* Wolly loves shareware. But

you knew that.

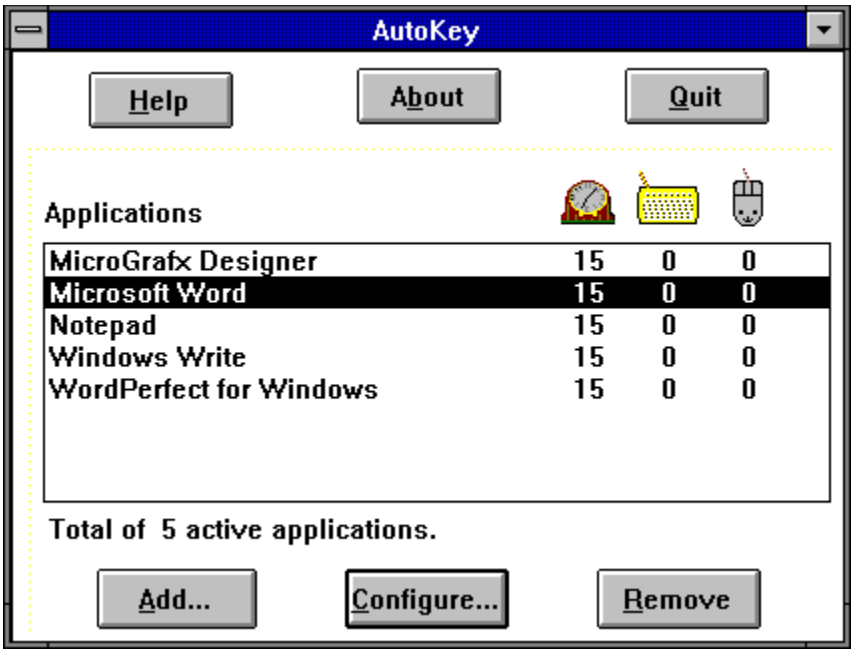
The WinOnLine Review Shareware Edition is a spinoff of the original WOLR.
Download Issue #69 from WOL as WOLR69.ZIP. Good stuff!

AutoKey 2.0

There I sat, staring blankly at the screen. Everything had stopped cold. I sat in stunned silence, sweat forming on my forehead. Like a blinding flash of light, I was hit with an unexpected bombshell -- everything was gone. As the knot formed in my stomach, I knew I only had two options, the RESET BUTTON or the CONTROL-ALT-DELETE KEYS....

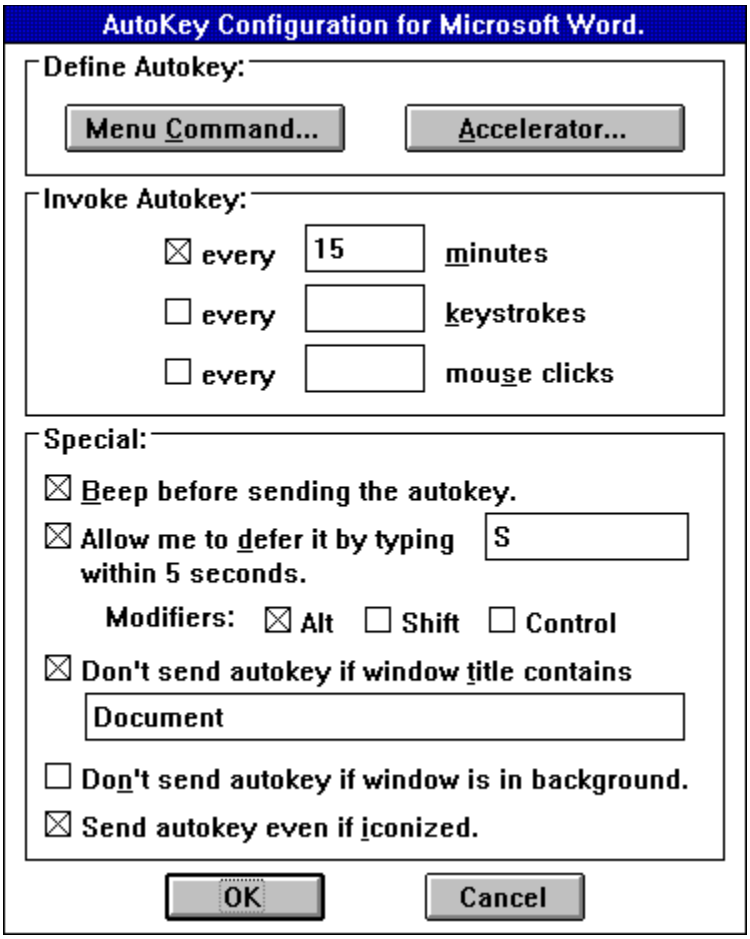
Sounds like the opening of a B-grade novel or movie doesn't it. Well, it's even worse than that. It's what happens when your computer, or more specifically, when Windows decides to take a break. Granted, Windows 3.1 does crash much less frequently than version 3.0, but nevertheless it still does crash. At least with 3.0 you'd get a UAE (Unrecoverable Application Error) message but, with version 3.1 everything simply stops. No matter whether it was the fault of Windows or simply something you did that you shouldn't have, the end result is the same, your program stops.

When this happened to me my first thought was always "when was the last time I saved this file." Many times, I couldn't remember saving it at all, or at best an hour before, and as you would expect, everything was lost. Then I would usually get philosophical and say to myself "I'll do it even better the next time." Well, today this is no longer a serious problem for me. No, I still make my share of stupid mistakes, and yes, Windows still takes an occasional break in the middle of a project. The reason I no longer live in fear of the dreaded UAE message or a system lock up is a shareware program called ***AutoKey 2.0.***



AutoKey 2.0 is a program that has one function: saving your bacon. The ***AutoKey*** program automatically saves your Windows files at a preset interval that you select. Thus releasing you from one of the more easily forgotten chores of computer work -- saving your files at regular intervals.

Once installed, the program is easily configured to suit the Windows programs you usually run. Each program can be saved in any of three ways: by time interval, a specific number of keystrokes, or a certain number of mouse clicks. Personally, I prefer saving the files every 15 minutes, but the choice is yours.



AutoKey does not actually save the files itself, rather the ***AutoKey*** program sends the necessary save instructions to the individual Windows programs you have selected. Each of these programs then performs their normal save routine. So, instead of a backup function, this program performs the same steps, or operations you would if you saved the file yourself. The ***AutoKey Configuration Window***, in addition to setting the save interval also allows you several special options. These include an optional beep before ***AutoKey*** sends the save instructions to the program. This is very useful for those files that you might be reading or using as they are and do not want saved. When this option is checked a defer key combination should also be used to stop the save operation. You then have 5 seconds to defer the save operation by pressing the defer keys before ***AutoKey*** performs the save operation.

You can even select the types of files that you do not want saved. For example, Windows Write uses the window title Write - [Untitled] for a blank screen. If you don't want to be prompted to save a blank document, simply type in the window title you want to ignore. The ***AutoKey*** program may even be set to send, or not to send, the save command to either a background application or an iconized program.

If you, like me, are sometimes forgetful and occasionally lose data, ***AutoKey*** is definitely a program that should be on your system. I personally keep ***AutoKey*** right in the RUN= line of my WIN.INI where it loads each time I start Windows. While this program cannot stop UAE's,

power failures, or our own blunders, it will make these catastrophes less painful by keeping a recent saved copy of your work. Members of Windows OnLine can find ***AutoKey*** as AUTOK2.EXE in Directory #150 - (Windows-New Uploads).

Notice:

Windows OnLine (BBS) makes every effort to identify and to post only shareware, freeware, demos, working models and drivers (software files and programs) for it's membership which are intended for free public distribution. Due to the lack of documentation and other descriptive files contained within certain archives, it can be quite difficult to identify and remove improper and otherwise copyrighted files and programs from our file listings.

It is the policy of Windows OnLine (BBS) not to allow such improper and illegal files and programs on the BBS, at any time. Our Readers and Members are asked to cooperate with us in our efforts to identify such improper files and to assist WOL in its efforts to remove ANY inadvertent inappropriate file postings.

Notice:

Windows OnLine (BBS) makes every effort to identify and to post only shareware, freeware, demos, working models and drivers (software files and programs) for it's membership which are intended for free public distribution. Due to the lack of documentation and other descriptive files contained within certain archives, it can be quite difficult to identify and remove improper and otherwise copyrighted files and programs from our file listings.

It is the policy of Windows OnLine (BBS) not to allow such improper and illegal files and programs on the BBS, at any time. Our Readers and Members are asked to cooperate with us in our efforts to identify such improper files and to assist WOL in its efforts to remove ANY inadvertent inappropriate file postings.

Thank You.

The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.

TOP TEN REASONS to
Register Your Readership

The **WinOnLine Review Shareware Edition**
is ***shareware itself***.

10. **IT'S CHEAP! As little as .00001893074581431 cents per second!**

9. **NO NAG SCREENS! (But if the publisher's wife ever gets your phone number, boy are *you* in for it!)**

8. **FREE SAMPLER MEMBERSHIP to the Windows OnLine™ (BBS) for instant gratification and access to 5 megs of these super files** (see details).

7. **Paul Schaeffer has no involvement with WOL house band.**

6. **Save download time and money! Feature Reviews and Shareware Briefs give you the inside track on what's good and bad.**

5. **Plea$e Help! Someone stole the Bill Gates hood ornament off the Publisher's Yugo.**

4. **It's just the *decent thing to do* (can we book you on a one-way guilt trip? All aboard!)**

3. **Our Research and Development Department is very close to a Scratch and Sniff popup. (just ponder what we could do with *that*!)**

2. **NO WAITING! The Shareware Edition comes out weekly with the news of the *latest programs, files and updated drivers* available to bulletin board users. No print publication can match our quick response time!**

1. **We can afford Kibbles & Bits for Wolly instead of the generic brand.**

The Details:

After you read this issue you'll see for yourself what a **valuable tool** it is for your search for the ***ultimate in shareware and new files***, please subscribe to this publication. **You should subscribe** because the only way for this publication to continue and grow is if **YOU** support it and **register your readership**, which is like buying a subscription. Please read these details of what you get for Registering your Readership to the WinOnLine Review, Shareware Edition. We want to be completely clear on your rights to read the magazine and the details of the bonus Sampler Membership to Windows OnLine™ (BBS):

+ Your Registration entitles you to read up to 52 issues, (past and future), of the WinOnLine Review, Shareware Edition. The publisher reserves the right to change publication schedules and/or modify the magazine without notice.

+ The magazine will be available for download from Windows OnLine™ (BBS) from a free file area; it may also be available from a local BBS or other service to which you are a member. Your shareware Registration **does not include delivery of the magazine in the form of any media**, nor does it assure its continuing availability from any source other than Windows OnLine™ (BBS).

+ Your Bonus Sampler Membership to Windows OnLine™ is for a term of fifteen days or 500 minutes of on-line time, whichever comes first. You are entitled, during that period, to download up to five (5) megabytes of files. Files which are designated as "free", such as filelists, WinOnLine™ Review™ publications, certain utilities, etc., do not count towards your five megabyte allowance.

If you register on-line, the fifteen day period of your Sampler Membership begins immediately.

If you register by mail, please allow up to ten days for processing (foreign members allow for mail delays). Your Sampler Membership time will begin the first time you successfully log-on with your specified name and password.

($9.95 for a year of 52 issues)

About Memberships

Windows OnLine™ Interactive Database Services

What does Windows OnLine™ offer it's membership?

1. FILES!

We have been told that we have one of the most extensive Windows file databases anywhere in the world. Also, because we are so discriminating, we supply you with some of the best and latest DOS, OS/2 files!

You won't find a lot of "junk" files on WOL. As our regular members know, we pride ourselves on having better file descriptions and, once our files are out of the recent uploads directory, unlike other bbs's, all of OUR file dates are CORRECT!

We have many features at WOL to make your Windows file collecting both fast and easy. We remove dupes and older files as fast as we can find them.

WE supply almost all files you see here. Therefore, you can be sure that you will see many new files every day, that is our pledge to our membership.

Is there more? ... you bet! But, I'll let you discover some of our innovations for yourself.

2. Network (Message) System

Receive support from within our own local message conferences, or access the world! Windows OnLine is your doorway to four international mail networks:

ILINK - RIME - SMARTNET - INTELEC

Explore over 650 separate Conferences that contain over 200,000 current messages on topics you're interested in .We have Windows Local, Windows Tips, and hundreds of internationally echoed conferences like Windows, Multitasking, DOS Tips, Languages, Tech Support, Microsoft Support and much more.

3. Doors

These external programs allow you to save your extra time for your next visit .Doors that will help manage your off-line mail and capture the our New Files listings, all automatically. We even have a Voting Door so you can express your views on the burning issues of the day, for fun and information.

4. WinOnLine™ REVIEW™ Magazines:

Read our NEW WinOnLine™ Review™ Shareware Edition

We offer TWO Windows Magazines. Past issues of the WOL NEWS, WOL *Weekly* and the WinOnLine™ REVIEW™ and NOW the Weekly Shareware Edition. All issues are downloadable from directory #100, and are FREE to Members.

5. Bulletins

These bulletins are posted permanently .We use bulletins to inform you of important information and discuss subjects that we feel you may be interested in. They are posted as a reference.

Details

All memberships with file privileges have their time given in eight hour blocks. That is, with each call you will start with 480 minutes. Time is given this way until you run out of minutes. We feel that this will be a great benefit to all callers who wish to call WOL once in awhile and download like crazy, such as on weekends. This eliminates any real need for saving your excess time. Your account is only charged for what you use.

Membership fees are non-refundable - memberships can not be upgraded or downgraded. You may purchase and use more than one membership at a time. Your

Membership expires when any one of your limits are reached. You can renew your membership at any time and your new membership will start when your old membership expires.

Windows OnLine™ reserves the right to deny membership or give a prorated refund to any existing member, at its option, for any reason.
