About the Shareware Edition

The **WinOnLine™ Review™ Shareware Edition** is published weekly by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Each and every week** we bring you the *newest shareware, freeware* programs and *features*, such as:

Windows Shareware Briefs - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

New Files - Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

Feature Reviews - Hear about hands-on experiences with the inner workings of the some of the **newest shareware**, with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

The WinOnLine™ Review™ Shareware Edition *is published weekly courtesy of the* **Windows OnLine™**

We hope you find this weekly publication of great value and interest and become a regular reader. We'd appreciate your comments and suggestions. Leave a comment (C) on **Windows OnLine™ (BBS)** at **1-510-736-8343** or write to,

Welcome to the
WinOnLine™ Review™
SHAREWARE EDITION

The **WinOnLine™ Review™ Shareware Edition** is now **FREEWARE!!**

It was originally decided to use the shareware concept for the magazine, but this publication is now FREE for all to read and enjoy. It is our hope that you will visit Windows OnLine (the bbs) and become a member of our on-line service. That action by you will directly support this magazine and continue the Monthly WOLR Review too. Only with YOUR direct support and your purchase of a WOL bbs membership will these magazines continue.

As long as we have **sufficient interest** in our magazines
and enough **new members joining Windows OnLine™ (BBS)**
who name the **Shareware Edition** as the way they found out about WOL,
The **WinOnLine™ Review™ Shareware Edition** will continue to be
freeware.

So, please **call**
Windows OnLine™ (BBS) at 1-510-736-8343 (modem) and browse around TODAY.

Check out the high quality files pouring in daily! You're sure to want to make **Window OnLine™ BBS** your choice. We comb the country for the best files, work them over to eliminate the clutter and duplicates, and post the finest Windows, OS/2 and DOS files for you every day. When you decide to join WOL, let us know if you learned about us from the **Shareware Edition**.

Another change to the **WinOnLine™ Review™ Shareware Edition** is the discontinuance of our DOS New Files listings. It simply became too large to include. You see the huge listing of New Windows Files? More than *twice* as many DOS files are posted each week, so it is quite a listing! Please give us a call for the latest and greatest in DOS as well as Windows.

Please, pick up and enjoy this magazine each week. We hope our evaluations and reviews will inform and entertain you. The Files sections brings you the latest GUI oriented files for your browsing pleasure to alert you to that new Windows program, driver or file that you've been looking for!

Enjoy!

WIN BOND

And you thought the government nagged you for money

Millions of Americans boosted investments in **Series EE Bonds** as bank rates dropped as the 6% Bond rate and its deferred interest became ultra-attractive. Unfortunately for investors, rates were recently dropped to more realistic levels, but I'll bet there are a bunch of people out there holding a fistful of EE Bonds, trying to figure out what their investment is worth. Win Bond is a program which will keep **multiple inventories of bonds** by serial number, purchase date and denomination, and **provide meaningful reports** of your holdings.

Create a **separate database** for each name registration if you want, and enter or import (the program will read an ASCII file) the pertinent information about each bond. This serially numbered inventory could also be useful in the event of lost bonds. Reports available include; *Bond Value, Interest, Sold Bonds, Future Value*, and the ability to create ASCII file output. You cannot print these wonderful screen reports in their nicely displayed format, but can open that ASCII file to which the content is exported. Don't make a mistake and try to open the ASCII file option twice. Win Bond will crash and burn if you do. **WINBND22.ZIP** (83K) offers a nice interface which is unfortunately interrupted by an overeager nag screen every three minutes or so. Definitely **nagware** to the max. If this doesn't bug you as much as it did me, perhaps you'll register Win Bond for **\$15.00**.

TET GAG

Mess up your colleagues' minds

Has the drone in the next cube done nothing but play Solitaire since MIS came around and installed Windows? Wouldn't be so bad if he wasn't making more than you are. Mess with his mind and **increase his PQ** (paranoid quotient) with TET GAG. Plot with your buddy in MIS to install this creature on his machine. Let him overhear a few comments about management monitoring non-business activity. Then watch the fun begin as he starts Tet Gag and enters his name. Up pops an official looking box advising that (NAME) HAS BEEN LOGGED ATTEMPTING TO RUN TETRIS. This has definite possibilities. **TETGAG.ZIP** (33K) is nastyware (and **freeware**).

SCARY WINDOWS

Let's rename this Stupid Windows

Author Sylvain Tremblay describes this trauma as "a small Windows hack" and avoids further detail because "it would break all the fun". Wolly **did not have fun** when this program pushed open windows around the screen to avoid the mouse. Primarily because this "hack" provided no escape from the mouse trap. Fortunately, Wolly did not lose anything of importance, but **Scary Windows could certainly ruin someone's day**. Pranks are fun, but those which are potentially destructive are not. **SCARYWIN.ZIP** (6K) is scary only in terms of the result, and is **dumbware** as well as **freeware**. Fortunately, Wolly saves everything before executing any new program. Give us a warning, Sylvain, and an out, and maybe it might be more fun and less stupid.

TORQUE

True Video Measurement?

President of Spinrite and columnist Steve Gibson presents Torque as **freeware**. He made quite a few waves in the video card arena when he spoke in his column in InfoWorld of "**cheats**" by **video accelerator card manufacturers**. He stated that certain drivers were specially written to **fake out WinMark** and other test measurements, achieving higher scores than real life use would support. His Torque program measures a *system's true bitmap "blitting" performance, even in the presence of systems which "cheat"*. For clarification on blitting and such, download **TORQUE.ZIP** (28K), read the docs and use it to test rival cards.

START PROGRAM

Pick a day, any day

Start is a **clever and useful** program that addresses a need you might have. It maintains its own little **startup group of programs** to be run when Windows is launched. So what, you ask? How about if you could have a **different group each day**, to run your backup on Fridays, your virus checker on Mondays and Thursdays? The program is also configurable so as to not run a program more than once if you must reboot that same day. **Nice interface, browse function** to

easily set up that program, an **adjustable timer** to give you a chance to abort its mission. What more could you ask for. How about just a **\$1.00** shareware fee for author Nick Hodges, to register **START12.ZIP** (61K). Now *that's* a bargain!

SUBLIMINAL HELP

Subtle JOIN WOL psychological urging SEND MONEY to conquer WRITE WOLLY A FAN LETTER bad habits

Webster describes subliminal as *inadequate to produce a sensation or a perception*. The technique is to introduce a stimulus in some manner, such as visual or auditory, that will **penetrate the unconscious mind and motivate the target subject**. Subliminal Help purports to provide a stimulus in the form of quickly **flashed messages in the title bar** of the active application. The attractive interface offers ten categories of messages to choose from and allows custom messages.

Users can have a single message repeat every twenty seconds or a group rotate, in case you have every bad habit listed, I suppose. The program discloses its nag screen at the beginning. I wonder if "register this program" is one of the messages?!? (Why am I writing this check out while writing this review?? - only kidding!) The flashing change in the title bar is noticeable, but the actual content of the message was not consciously perceivable. Clickware wisely states: *"ClickWare also disclaims all results or lack of attributed to this program. ClickWare will not guarantee that this program will help any person to lose weight or quit smoking. Moreover, ClickWare will not guarantee that subliminal messages are a legitimate form of personal-development or self-help . . . Clickware or it's employees do not claim to be doctors, technicians or experts in the field of subliminal messages. It is up to the user to determine if subliminal messages help him or her."* **SUBLIM20.ZIP** (44K) can be registered for **\$20.00** if you feel it has merit for you.

MASTER AMORTIZER

Oh, No! Financial reality

What if? How much? What's the effect of a bit more, a bit less? Master Amortizer **goes beyond the mundane** spreadsheet orientation of payment amortization schedules into the sublime of useful calculations. The clean interface makes many functions available from drop down menus and icon bars. Once you've entered the base information of amount, term and rate, select a matrix of payment figures based on user-selectable increments of interest rates and principal

borrowed to see your range of options. Or view a bar chart of the payments and total interest you'll pay for varying terms.

One really useful feature of the program allows you to view your amortization schedule while popping up a box with an **interactive conclusion of how much you'd save** in interest and term if you added so many dollars to your regular payment. This can be a **real eye-opener and incentive** to add that \$50-100 to your mortgage payment. The ancient and cruel Rule of 78's can even be used instead of simple interest. But I'd move to another state before I got stuck with that rip-off method. Take a look at [AMOR28.ZIP](#) (217K) to see if it will fit your needs and help you get out from under your present mortgage or perhaps, under a new one. Registration is **\$21.95**.

WAVE SHELL

If I put it up to my ear, will I hear ocean WAVs?

What can you ask of a **\$1** shareware program? Wave Shell is simple, straightforward, and it works. Six clearly labeled buttons accompany a window of your WAV files, highlight one and play it, change your file path, edit it, choose your default editor, or click the ever-popular **about** or **cancel** (actually exit). [WAVSHL11.ZIP](#) (57K) is direct and cheap.

TRUE TYPE FONTS

The latest visual voices for your printer

Adine Kierberg Script [ADINEK-S.ZIP](#) (32K)
Albatross [ALBATR-N.ZIP](#) (37K)
Amelia Normal [AMELIA-N.ZIP](#) (20K)
ROGER DEAN ABWH [ABWH.ZIP](#) (19K)
Kelmscott [KELMTT.ZIP](#) (19K)

Roger Dean ABWH looks much better on paper than on screen and displays better at a size larger than the 18 point sample shown.

ICON MOVE

You heard me, icon, *move!*

A simple **freeware** program for a simple function. Scan your files and directories of icons in the left window. Highlighted **icon files display** their wares in the 32x32 box above. Scan your drive to locate the directory to which you'd like to copy the icon on the right. Press the magic button and "*Presto,*" **ICNMVE25.ZIP** (5K) from Caro Software has done its job. Sounds somewhat superfluous, but the advantage is in having the **reference display of the icon** you've selected, most helpful when it comes to those cryptic file names.

GRAPHICAL SPACE VIEWER

Where did my gig go?

Larger hard drives can quickly get out of hand. Wolly keeps his drive manageable by putting programs in large subdirectories: GR holds all the graphics-oriented programs, F for financial/numeric, WORD, CO, GAME, DB, etc. Only trouble is stuff tends to get buried a couple levels down and you're **suddenly short of disk space**. GRAPhical SPace Viewer solves that problem by **showing a color bar** next to each subdirectory **representing the amount of space** being used.

Options allow deeper penetration into the file structure, and bars can be labeled with **percentages of space, of total drive capacity, or simply bytes allotted**. Go full screen to see more, or print the results. **GRASP12B.ZIP** (42K) is a mere **\$5.00** from Silverware Computers. Register it if you use it. You know how embarrassing it is being caught stealing the silverware.

RIGHT ON

Right on, button, right on!

Author Steve McCarthy developed mouse tool Right On when he found out the \$15 shareware product *Whiskers* had become \$49 commercial software (ah, what we pay for a pretty box and a cash register receipt!). Right On offers a **use for the oft-unused right mouse button**. Assign key commands to the right mouse button by itself, with Shift, with Control, and with both. **RITEON01.ZIP** (51K) is **\$10** shareware, a financial improvement over the commercial Whiskers. Now what about my *middle* mouse button?

Wolly's Shareware Tips

If you're the type of animal that has to try a lot of shareware, like Wolly, it can easily get out of hand. Program groups begin to gain weight, and you forget what's good, bad, used, unused, registered and unregistered.

Wolly has a subdirectory called EVAL(uation) where shareware goes into subdirectories named the same as the zip file. A program group titled EVALS holds them for a looksee and a period of time to determine their use(less/ful)ness. Wolly uses another program group called ALMOST OUT where tired or rejected programs go to retire. After a while he'll scan that group and bounce anything that is still not being sought out for use.

To be completely honest, Wolly ignores shareware that proclaims a ten or fifteen day restriction unless he actually uses and therefore experiences the application every day. Few users of shareware actually use a graphics program, for example, more than a couple times in a fifteen day period, and it's not a fair tryout for either party. Each user has to establish his or her own standard as to when to register a program, but one which doesn't cheat the author or cause regret because of premature (and pre-bug discovery) registration of a program. Authors, be sensible. Users, be fair. And *everybody* wins!

My irrefutable opinion,

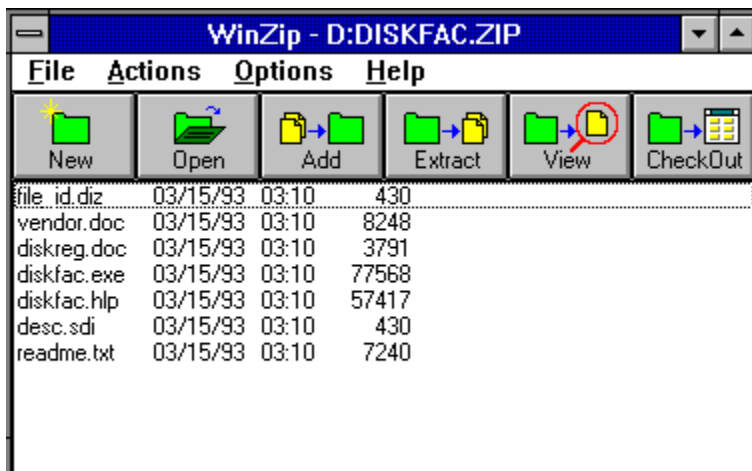

WinZip 4.0

File compression is one of the best methods to reduce the size of any file or program. Compressed, or archived, files not only take up less space on a hard drive, but they can greatly reduce the time and cost associated with file transfers to and from BBS systems. Just about everyone who has ever used a computer has, at one time or another, worked with compressed files. The most common types of compressed files are identified with the extensions: ZIP, ARJ, LZH, and ARC.

Just as there are a variety of different compression formats, there are also a variety of programs available to manipulate these files. Any archive created with any of these extensions, requires a specific utility program to both compress and uncompress the files. Since these archives need a variety of different programs, keeping everything straight when you work with compressed files can be troublesome. If you're like me, you'll sometimes forget where you put the specific programs you'll need to compress or uncompress your archives. To reduce the problems associated with this task one solution is [WinZip 4.0](#).

[WinZip](#) is a compression, or archive, shell program that allows you easy and painless access to a majority of the features of the most popular compression utilities. Working through a Windows interface, the [WinZip](#) program can be used to extract files from an archive, add files to an existing archive, or create a completely new archive. Rather than performing these actions

itself, *WinZip* calls the appropriate compression utility program to do the actual work.

WinZip is surprisingly easy to use. If you have the association for ZIP, ARJ, LZH, and ARC files set to the *WinZip* program, opening an archive is as simple as double clicking on the archive file name. Files may also be opened from File Manager by dragging and dropping the archive file onto the *WinZip* icon. Or finally, the Open button may be also used. The main window shows a listing of the file names, sizes, and date/time stamps for all files in the opened archive. The list can be scrolled and sorted on any field.

The tool bar provides fast access to all the commonly used actions. These six buttons across the top of screen are also large enough to see and will allow you to perform all the functions with a simple mouse click. All optional parameters of the program can also be saved and restored.

The NEW button is for creating a new archive. Simply click on this button and the program prompts you for an archive name and location of the files to be placed in the archive. Once these are selected, the program lists all the files contained in the directory you selected and allows you to add all the files, or only selected files to the new archive.

The OPEN button, as mentioned earlier, is used to open an existing archive. When this button is clicked a dialog box opens to allow you to select the archive you want to open. Once selected, the files contained in the archive are shown in the main window.

The ADD button permits you to add new, or updated files to an existing archive. When you click this button, the program opens the same dialog box used for the New option and allows you to select the specific files to be added to the existing archive.

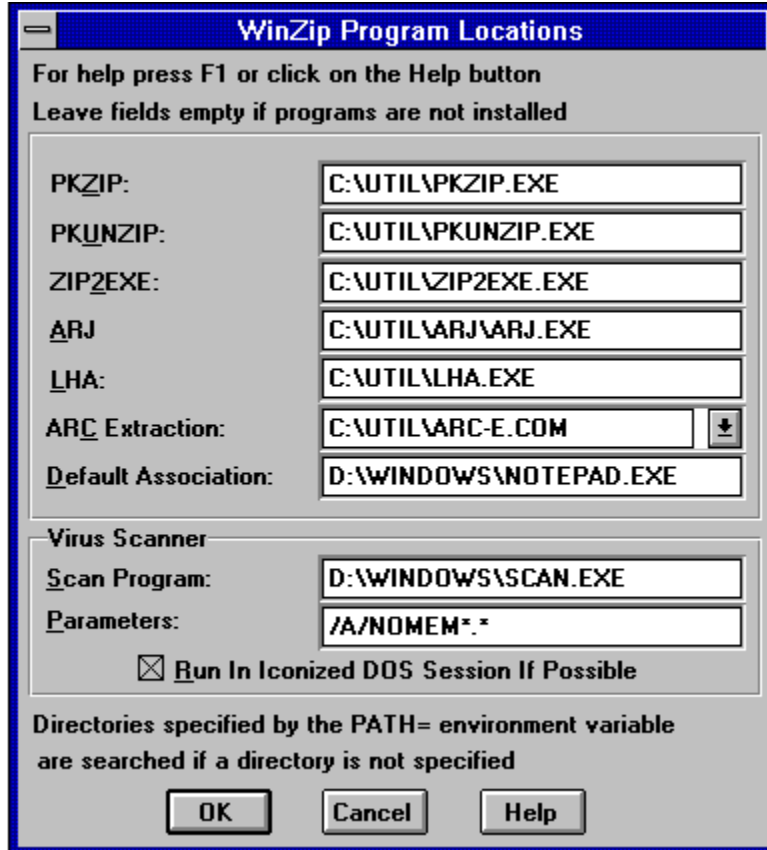

The Extract button, is used to extract files from an archive. The extract dialog box offers a variety of options and allows all files or only selected files to be extracted. The defaults are set to open all files unless selected files are highlighted in the main window. When specific files are highlighted, only these will be extracted unless you choose the All Files option.

The VIEW button permits you to see what a specific file contains. If for example you wanted to view a file, simply highlight the file name and click on the view button. The program then opens the archive and allows you to view the file. This operation can also be accomplished by double clicking on the file name. Here the archive is opened with the program you have set in your associations.

The CHECK OUT button allows you to extract all the files in an archive into a temporary directory. A Program Manager group for all the files in the archive is also created. The group is created with an individual icon for each file. To view a file, simply double click on the icon. When the *WinZip* program is closed, you're given the option to delete the temporary group and files.

The program locations windows allows you to specify the location of each of the archive utility program you have in your system. Once again, the *WinZip* program is a shell and does

not contain the various archiving utilities.

Some other useful features of the *WinZip* program are:
Support for PKZIP 2.04, and the ARJ file format.
Built-in ZIP extraction
Font selection for the list of files in the open archive.
ZIP to EXE conversion.
Optional virus scanning support.

So, if you use compressed, or archived files, the *WinZip* program will be a wise addition to your system. The program requires Windows 3.0 or 3.1 in Enhanced or Standard mode. Members of Windows OnLine can find *WinZip* as WINZIP4B.ZIP in Directory #150 - (Windows-New Uploads) and the following archiving shareware programs: PKZ204G.EXE - (Directory #100 - FREE DOWNLOADS); LHA213.EXE - (Directory 127 - DOS -Archivers Utils A-L); ARJ239D.EXE - (Directory 127 - DOS -Archivers Utils A-L); ARC-E.ZIP - (Directory 127 - DOS -Archivers Utils A-L).

Notice:

Windows OnLine (BBS) makes every effort to identify and to post only shareware, freeware, demos, working models and drivers (software files and programs) for it's

membership which are intended for free public distribution. Due to the lack of documentation and other descriptive files contained within certain archives, it can be quite difficult to identify and remove improper and otherwise copyrighted files and programs from our file listings.

It is the policy of Windows OnLine (BBS) not to allow such improper and illegal files and programs on the BBS, at any time. Our Readers and Members are asked to cooperate with us in our efforts to identify such improper files and to assist WOL in its efforts to remove ANY inadvertent inappropriate file postings.

Thank You.

The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.

About Memberships

Windows OnLine™ Interactive Database Services

What does Windows OnLine™ offer it's membership?

1. FILES!

We have been told that we have one of the most extensive Windows file databases anywhere in the world. Because we are so discriminating, we supply you with some of the best and latest DOS, OS/2 files!

You won't find a lot of "junk" files on WOL. As our regular members know, we pride ourselves on having better file descriptions and, once our files are out of the recent uploads directory, unlike other bbs's, all of OUR file dates are CORRECT!

We have many features at WOL to make your Windows, DOS, OS/2 and other file collecting both fast and easy. We remove dupes and older files as fast as we can find them.

WE supply almost all files you see here. Therefore, you can be sure that you will see many new files every day, that is our pledge to our membership.

Is there more? ... you bet! But, We'll let you discover some of our innovations for yourself.

2. Network (Message) System

Receive support from within our own local message conferences, or access the world! Windows OnLine is your doorway to four international mail networks:

ILINK - RIME - SMARTNET - INTELEC

Explore over 650 separate Conferences that contain over 200,000 current messages on topics you're interested in .We have Windows Local, Windows Tips, and hundreds of internationally echoed conferences like Windows, Multitasking, DOS Tips, Languages, Tech Support, Microsoft Support and much more.

3. Doors

These external programs allow you to save your extra time for your next visit. Mail doors help manage your off-line mail and capture the our New Files listings, all automatically. We even have a Voting Door so you can express your views on the burning issues of the day, for fun and information.

4. **WinOnLine™ REVIEW™ Magazines:**

Read our NEW WinOnLine™ Review™ Shareware Edition

We offer TWO Windows Magazines. Past issues of the WOL NEWS, WOL *Weekly* and the WinOnLine™ REVIEW™ and NOW the Weekly Shareware Edition. All issues are downloadable from directory #100, and are FREE to Members.

5. **Bulletins**

We use bulletins to keep you informed of important information and discuss subjects that you want to know more about. They are posted as a valuable reference.

Details

All memberships with file privileges have their time given in eight hour blocks. That is, with each call you will start with 480 minutes. Time is given this way until you run out of minutes. Your account is only charged with the time you use. We feel that this will be a great benefit to all callers who wish to call WOL once in awhile and download like crazy, such as on weekends. This eliminates any real need for saving your excess time.

Membership fees are non-refundable - memberships can not be upgraded or downgraded. You may purchase and use more than one membership at a time. Your membership expires when any one of your limits are reached. You can renew your membership at any time and your new membership will automatically start when your old membership expires.

Windows OnLine™ reserves the right to deny membership or give a prorated refund to any existing member, at its option, for any reason.
