

## Read Me

Some computers with SoundBlaster(TM) and SoundBlaster Pro(TM) sound cards may experience problems running this and other programs. If after you successfully install and launch this program you experience intermittent loss of sound, the sound driver corresponding to the sound card may be the problem. The problem can be corrected by changing to an updated driver. Creative Labs, Inc. the makers of SoundBlaster sound cards, supply updated drivers.

You should contact the technical support of Creative Labs, Inc. at (405)742-6622, or their Bulletin Board ( BBS ) at (405)742-6660. They supply the latest sound drivers for the SoundBlaster family of sound cards."

This title has been created with the Apple Media Kit. It requires QuickTime for Windows©.

For video and sound driver and card compatibility please consult the QuickTime for Windows© Read Me.

The default settings have been selected to be compatible with most of the hardware configurations. To improve performances, you can try to change the following settings:

-in QTW.INI in your Windows directory, replace

[Video]  
Optimize=Driver

by

[Video]  
Optimize=Hardware

-in AMT.INI in your Windows directory, replace

[Video]  
Transparency=Bitmap

by

[Video]  
Transparency=Driver
