

The files in this directory are for those PhotoMorph 2 users who would like to see how certain projects provided on this CD-ROM were made. Some .PMP files require the Stylize module to load properly. For more information about the Stylize module, or to order a copy, call 800-274-9674.

As a bonus, three tutorial files have been included: VIDWIN.TXT describes how to create "Video in a Window" Effects. BEAMUP.TXT illustrates the "Beam Me Up" effect made popular by Star Trek. The third tutorial, SCALEAVI.TXT explains a method of using PhotoMorph 2 for resizing video files. These tutorials were originally created for the North Coast Software forum on CompuServe (GO PMORPH).
