

The Lloyd Utilities

I. Thank you for purchasing The Lloyd Utilities.

A. Thanks for your purchase of Lloyd. This money will go to the further development of future Lloyd games. We here at Viper are very excited about the release of this game. We hope you enjoy playing just as much as we enjoyed making it.

II. Requirements

- A. To use the utilities, you will have to have at least a 386 with 2 megs ram. Although the game will run on this machine, we strongly recommend that you have at least a 486 with 4 megs ram, and a windows sound system compatible sound card.
- B. This game will run on a computer with a 16 color graphics adapter, but the quality of the pictures will be very poor. If you are running 16 million colors, you will get the best quality graphics, but you will have to sacrifice speed. The best overall graphics setting is at 256 color mode.

III. Installation

- A. To install from Windows 3.1, insert disk number 1 and go to the "File" menu. From there, select the "Run". Type in the command line: "A:\setup.exe" (without the quotations). From there, the setup program will start and it will ask you for the directory to install the game to. Unless you know what you are doing, just use the default directory it gives you. It will then copy all of the files and make a program group for you. To start the game, simply double click on the icon it made for you.
- B. To install the game in Windows 95, follow the same instructions above, except instead of "File", click on the start button.

VI. Disclaimer

- A. Viper Production does not take responsibility for anything this or other programs may do to your computer. We will in no way be held responsible for anything that might happen. All errors or computer problems that occur during, before, or after the installation of this game are merely a fluke. Nothing that happens is intentional and we take no credit for it.
- B. Windows, Windows 3.1, and Windows 95 are registered trademarks of the Microsoft Corporation.

VII. Errors in your program disks.

- A. If your disks seem to have some sort of error with them, and they won't install or if you are having trouble getting the game installed, please feel free to contact us by means of written forms.

Write any complaint, compliment, or problem to:

Viper Productions
9440 Hwy. 57
Brussels, WI 54204

- B. To get your broken disks fixed, just send them to us at the address above, and we'll fix or replace them at no charge, just one catch though, you have to tell us what's wrong with it.
