P

The information that follows in this course is designed toF
P

take the student through the steps necessary to become anF
P

efficient user of dBase IV in the shortest possible time. dBaseF
P

IV is a new system for creating and maintaining databases. It hasF
P

its roots in earlier versions of dBase and much of it will beF
P

familiar to those who already know one of the previous versions.F

P

The materials presented in DESIGNING DATABASES WITH DBASE IVF
P

are designed for managers and first-time system designers. In itF
P

is taught the concepts of systems analysis and design and the use of
P

of the Control Center to create complete systems withoutF
P

programming. ADVANCED DATABASE DESIGN WITH DBASE IV is designedF
P

for those who have mastered the implementation of simple systemsF
P

and wish to build relational systems including SQL and customF
P

dBase coding. There is emphasis on the Developer's Edition
P

features and usage.F

P

These courses are designed to be taught in both hands-on andF
P

lecture formats. In the lecture format the course will be taughtF
P

in 2 days. In the hands on format it will be taught in 5 days.F
P

The additional time for the hands-on students will allow ampleF
P

practice problems to master the use of dBase IV before the end of
P

instruction.F

P

The data diskette contains the files used during thisF
P

course. All examples shown during the course can be recreated at
P

a later time using these files. LOG to Drive A: and enterF
