

MultiView - the multiple AVI viewer for Windows

MultiView will allow you to open four AVI files at once. But that's not all.

Requirements:

- >Microsoft Windows 3.1
- >Microsoft Video For Windows v1.1 Runtime - available on most on-line services
- >Microsoft Visual Basic Runtime - VBRUN300.DLL - also available on most on-line services
- >Windows Sound Driver to hear sound from the movie files, or to use MultiView AudioView
- >and, of course, AVI movies to watch, and WAVE and MIDI files to listen to!

Installation Instructions:

Unzip the contents of MULTIV.ZIP to a diskette.
Run the SETUP.EXE program.
Choose the directory you wish to install MultiView into.
You may also choose to install a MultiView program group and icon into Program Manager.
The resulting installed files are:

MULTIVU.EXE - the MultiView executable
MULTIVU.HLP - MultiView's help file
MV.INI - the MultiView preferences file
MCIWNDX.VBX - this MCI control module is placed into your
 WINDOWS\SYSTEM directory
THREED.VBX - this Visual Basic 3D control module is placed into your
 WINDOWS\SYSTEM directory

Version 4.5

New! MultiView AudioView. Plays WAVE and MIDI files. No need to crank up another program to play your sound files. Open a sound file from within MultiView, and the MultiView interface changes into MultiView AudioView. MultiView AudioView can shell out to your favorite audio editor. Nag screens have been limited to only appearing when starting and shutting down MultiView. Of course these reminders disappear once you register MultiView.

Version 4.0

The MultiView Control Bar is now the MultiView Control Box. The Loop command has been aptly renamed to Restart, and a "real" Loop command has been added. Support for a command line parameter allows for MultiView to be used as a default AVI viewer (by association). Added the ability to copy a frame to the Windows' clipboard. Multiple speed settings. The last ten AVI files opened by MultiView are retained and easily selected directly from the File menu. Custom AVI from VHS transfer service outlined in Help file. MultiView Capture is no longer bundled with MultiView.

Registration

MultiView is not freeware. It is shareware, and the author will add you to his registration list for *only* \$30. This registration is your vote to continue the development of MultiView. Registration will also entitle you to discounted upgrades, *and you will receive a license number that will disable the registration reminders.*

Register now, and you will be entitled to registration for all MultiView 4.x upgrades. If you are registered for Version 3.x and would like to upgrade to MultiView 4.5, the registration fee is only \$10. Registered users of Version 2.x and 1.x may upgrade for \$25.

If you want to cast your vote for MultiView, send a check for \$30 to:

Robert Reinstein
20 Singingwood Drive
Holbrook, N. Y. 11741

Or, register on-line on CompuServe. **GO SWREG # 4736**. You will receive your registration number via e-mail.

Any comments or questions can be addressed to the above or to CIS ID # 76702,2045.

Thank you for your interest in MultiView!
