**Collection List**

This list box displays the names of all Second Nature image collections that you have installed on your computer.

**Special Effects**

Displays a list of all of the special drawing effects that you can choose (such as mosaic, blinds or converge).

**Display Captions**

Turns on or off image captions at the top of the screen.

**Stretch Images to Screen**

Stretches the image to fill the screen if it is smaller than your current screen size.

**Synchronize Wallpaper**

Sets the desktop wallpaper image to the last image displayed in the screen saver.

**Image Cycle Speed**

Controls the amount of time between each image while the screen saver is running.

**More Images**

Displays a complete catalog of all the add-in image collections available for the screen saver. You can purchase any of these collections from the Second Nature CD that came with your computer.

**Display All**

Displays all collections sequentially.

**Random Order**

Displays one image from each collection, then one image from the next collection, etc.
