Problem   Not clear exactly what problem this application attempts to
          solve. Appears to be aimed at demonstrating Symphony FORM
          window, Window mgmt, and macro features.

          Looks like a database set up to record and prioratize sales
          leads.

Block Diagram

```
 _____   _____
|                   | |                   |
|   Database Defs   | |    Macros         |
|_____| |_____|
|                   |
|     Database      |
|_____|
```

Tips

          Calcuted field in FORM definitions cell E38

          Macros use windows extensively.

          Fancy string formulas at F5 and F6
